Depicts the early cameras and the images they produced, and describes the contributions of pioneering photographers and photographic equipment engineers.

Photography: History and Theory introduces students to both the history of photography and critical theory. From its inception in the nineteenth century, photography has instigated a series of theoretical debates. In this new text, Jae Emerling therefore argues that the most insightful way to approach the histories of photography is to address simultaneously the key events of photographic history alongside the theoretical discourse that accompanied them. While the nineteenth century is discussed, the central focus of the text is on modern and contemporary photographic theory. Particular attention is paid to key thinkers, such as Baudelaire, Barthes and Sontag. In addition, the centrality of photography to contemporary art practice is addressed through the theoretical work of Allan Sekula, John Tagg, Rosalind Krauss, and Vilém Flusser. The text also includes readings of many canonical photographers and exhibitions including: Atget, Brassai, August Sander, Walker Evans, The Family of Man, Diane Arbus, Lee Friedlander, Cindy Sherman, Bernd and Hilla Becher, Sebastiao Salgado, Jeff Wall, and others. In addition, Emerling provides close readings of key passages from some major theoretical texts. These glosses come between the chapters and serve as a conceptual line that connects them. Glosses include: Roland Barthes, "The Rhetoric of the Image" (1964) Susan Sontag, Regarding the Pain of Others (2002) Michel Foucault on the archive (1969) Walter Benjamin, "Little History of Photography" (1931) Vilém Flusser, Towards a Philosophy of Photography (1983) A substantial glossary of critical terms and names, as well as an extensive bibliography, make this the ideal book for courses on the history and theory of photography.

The history of photography is best revealed in the history of what makes it possible--the camera.

From a delivery boy to one of the most important industrialists in American history, George Eastman's career developed in a particularly American way. The founder of Kodak died in 1932, and left his house to the University of Rochester. Since 1949 the site has operated as an international museum of photography and film, and today holds the largest collection of its kind in the world. The continually expanding photography collection contains over 400,000 images and negatives - among them the work of Alfred Stieglitz, Edward Steichen, Ansel Adams and others - as well as 23,000 cinema films, five million film stills, one of the most important silent film collections, technical equipment and a library with 40,000 books on photography and film. The George Eastman House is a pilgrimage site and a place of worship for researchers, photographers and collectors from all over the world. This volume shows in chronological order the most impressive images and the most important developments in the art of light that is photography. It provides in its huge collection and themes a unique survey of the medium from its origins until now.

Explores the relations between photo-journalism and history, investigating how photographs shape both, what we remember and

how we remember. This book provides insight into how photographs, generate a sense of national community, and reinforce prevailing social, cultural, and political values.

As its title suggests, *Negative/Positive* begins with the negative, a foundational element of analog photography that is nonetheless usually ignored, and uses this to tell a representative, rather than comprehensive, history of the medium. The fact that a photograph is split between negative and positive manifestations means that its identity is always simultaneously divided and multiplied. The interaction of these two components was often spread out over time and space and could involve more than one person, giving photography the capacity to produce multiple copies of a given image and for that image to have many different looks, sizes and makers. This book traces these complications for canonical images by such figures as William Henry Fox Talbot, Kusakabe Kimbei, Dorothea Lange, Man Ray, Seydou Keïta, Richard Avedon, and Andreas Gursky. But it also considers a number of related issues crucial to any understanding of photography, from the business practices of professional photographers to the repetition of pose and setting that is so central to certain familiar photographic genres. Ranging from the daguerreotype to the digital image, the end result is a kind of little history of photography, partial and episodic, but no less significant a rendition of the photographic experience for being so. This book represents a summation of Batchen's work to date, making it be essential reading for students and scholars of photography and for all those interested in the history of the medium

While looking through his contact sheets in 2007 Harvey Bengé noticed that one of his pictures reminded him of a Friedlander, another of an Atget, yet others of a Tillmans, a Baldessari and Adams a Picking them out he decided to make what leading UK photography critic Gerry Badger describes in his opening essay as an 'anthology' of contemporary photography featuring some of its biggest names. The result is a sharply curated and perfectly formed collection of intriguing, beguiling and seductive images, sure to delight the photography aficionado and newcomer alike. 'Of course they are all genuine original Bengés. And it is important that they are all good pictures, not mere pastiches of the "originals" of which they gently but insistently remind one. This may be a game, but games can be very serious, and this is both as serious and light-hearted exploration of photographic style.' - Gerry Badger

Over the past decade, historical studies of photography have embraced a variety of cultural and disciplinary approaches to the medium, while shedding light on non-Western, vernacular, and "other" photographic practices outside the Euro-American canon. *Photography, History, Difference* brings together an international group of scholars to reflect on contemporary efforts to take a different approach to photography and its histories. What are the benefits and challenges of writing a consolidated, global history of photography? How do they compare with those of producing more circumscribed regional or thematic histories? In what ways does the recent emphasis on geographic and national specificity encourage or exclude attention to other forms of difference, such as race, class, gender, and sexuality? Do studies of "other" photographs ultimately necessitate the adoption of nontraditional methodologies, or are there contexts in which such differentiation can be intellectually unproductive and politically suspect? The contributors to the volume explore these and other questions through historical case studies; interpretive surveys of recent historiography, criticism, and museum practices; and creative proposals to rethink the connections between photography, history, and difference. A thought-provoking collection of essays that represents new ways of thinking about

photography and its histories. It will appeal to a broad readership among those interested in art history, visual culture, media studies, and social history.

A compact edition of Hockney and Gayford's brilliantly original book, with updated material and brand-new pieces of art Informed and energized by a lifetime of painting, drawing, and making images with cameras, David Hockney, in collaboration with art critic Martin Gayford, explores how and why pictures have been made across the millennia. Juxtaposing a rich variety of images--a still from a Disney cartoon with a Japanese woodblock print by Hiroshige, a scene from an Eisenstein film with a Velazquez painting--the authors cross the normal boundaries between high culture and popular entertainment, and argue that film, photography, painting, and drawing are deeply interconnected. Featuring a revised final chapter with some of Hockney's latest works, this new, compact edition of A History of Pictures remains a significant contribution to the discussion of how artists represent reality.

Defining the Chief Executive via flash powder and selfie sticks Lincoln's somber portraits. Lyndon Johnson's swearing in. George W. Bush's reaction to learning about the 9/11 attacks. Photography plays an indelible role in how we remember and define American presidents. Throughout history, presidents have actively participated in all aspects of photography, not only by sitting for photos but by taking and consuming them. Cara A. Finnegan ventures from a newly-discovered daguerreotype of John Quincy Adams to Barack Obama's selfies to tell the stories of how presidents have participated in the medium's transformative moments. As she shows, technological developments not only changed photography, but introduced new visual values that influence how we judge an image. At the same time, presidential photographs—as representations of leaders who symbolized the nation—sparked public debate on these values and their implications. An original journey through political history, Photographic Presidents reveals the intertwined evolution of an American institution and a medium that continues to define it.

This book is in the form of a box of flashcards. It contains 41 cards (40 plates and one colophon), and an eight-page accordion folded essay booklet. Inside this box, you will find an edited, reinterpreted, recontextualized, and humorous slice of photographic history. This work was produced in a moment of elongated reflection during the height of the Covid-19 pandemic. Four photographers, comprising the Rolls & Tubes

Collective, examined the events unfolding around them and, through a collaborative effort made images in response. Every one of these images pulls from the history of photography, utilizing the classical canon along with pieces that were perhaps overlooked by historians. In response to the ongoing pandemic shortages, the Rolls & Tubes Collective members individually selected photographs to restage with toilet paper as the main foil in each composition. The new pieces reveal another history; one that originates within each Collective member's personal experience with the history of photography. As photographers with distinct backgrounds, the history of photography was a part of their formal training, but each member encountered a changing roster of photographers in the canon dependent on when and where they encountered it. Along with that, the act of looking at images is intrinsically embedded in their processes, exploding the history outward in all directions. It speaks to how photographic history (or really any history) does not have a defined form; the shape changes and shifts over time. Together, the photographs in flashcard form provide one malleable history. Enjoy this history. It is just one history out of many; perhaps it will inspire you to think about your own. The cards in this box are being delivered to you in order of their appearance in the history of photography. Feel free to reorganize them in the way you would prefer it to have happened. In these pictures we have indulged that impulse again and again.

Traces photographic history both topically and chronologically, profiles key masters, explains terms and processes, and features the landmarks in the development of photography.

Groundbreaking work telling the story of women and non-binary photographers from the 1800s to the present day From the fashion studio to the front line, social justice movements to selfies, women have transformed photography at every stage in its short history. For some, gender is front and center of their work, for others it's beside the point. All are affected by the power structures beyond their lenses. Far too many are overlooked. Photography - A Feminist History explores how women's rights and societal attitudes to gender across the world have shaped those who have become photographers, the kinds of work they have made, and how their stories have been written - and rewritten - over time. Mapping photography's history against gender-based rights, social justice movements, and shifting cultural norms, it shines a light on the factors that have motivated, supported and inhibited women and non-binary photographers from the 1800s to the present day. How did the abolitionist movement impact women's entry into the field? What does photography have to do with laws around menstrual rights? Is there even such a thing as a feminist image? International in scope, Photography - A Feminist History includes the work of over 200 photographers, both established and lesser known, with thematic essays and extended texts on 75 practitioners, many compiled from interviews with the author. Includes work by Dora Maar, Homai Vyarawalla, Lee Miller, Zofia Rydet, Poulomi Basu, Laia Abril, Lebohang Kganye and Mari Katayama, plus many more.

Walter Benjamin's 1931 essay "A Short History of Photography" is a landmark in the understanding and criticism of the medium, offering surprising new takes on such photographic pioneers as David Octavius Hill and Nicéphore Niépce and their aesthetic and technical achievements. On Photography presents a new translation of that essay along with a number of other writings by Benjamin, some of them presented in English for the first time. Translator and editor Esther Leslie sets Benjamin's work in context with prefaces to each piece and contributes a substantial introduction that considers Benjamin's engagement with photography in all its forms, including early commercial studio photography, the uses of photography in science, and much more.

The Colors of Photography aims to provide a deeper understanding of what color is in the field of photography. Until today, color photography has marked the "here and now," while black and white photographs have been linked to our image of history and have formed our collective

memory. However, such general dichotomies start to crumble when considering the aesthetic, cultural, and political complexity of color in photography. With essays by Charlotte Cotton, Bettina Gockel, Tanya Sheehan, Blake Stimson, Kim Timby, Kelley Wilder, Deborah Willis. Photographic contributions by Hans Danuser and Raymond Meier.

The fourth volume in a history of photography, this is a bibliography of books on the subject.

A compact, readable, up-to-date overview of the history of photography.

In this landmark volume, Rosenblum (*A World History of Photography*) examines sympathetically the achievements of women in photography since its invention in 1839, and highlights society's failure to give them appropriate recognition. One research obstacle the author encountered was the 19th-century practice of men taking credit for work done by women. Here is work from 250 female camera artists, from Julia Margaret Cameron (b. 1815) to Annie Leibovitz (b. 1949), who, despite strong cultural resistance, mastered everything from early wet-plate views and portraits to 35 millimeter photojournalism, often initiating aesthetic and commercial improvements. Her chronicle of women's part in each era's artistic movements and media transitions, plus capsule biographies with an in-depth bibliography and index, make this a seminal reference work. The author's choice of 263 photographs seems to favor the esoteric, bringing to light a largely unknown world in vivid originality and broad archival conception.

The third edition includes up-to-date information about contemporary photographers like Cindy Sherman and Yang Yongliang, and comprehensive coverage of the digital revolution, including the rise of mobile photography, the citizen as journalist, and the role of social media. Highly illustrated with full-color images and contributions from hundreds of artists around the world, *Seizing the Light* serves as a gateway to the history of photography. Written in an accessible style, it is perfect for students newly engaging with the practice of photography and for experienced photographers wanting to contextualize their own work.

A picture-rich field guide to American photography, from daguerreotype to digital. We are all photographers now, with camera phones in hand and social media accounts at the ready. And we know which pictures we like. But what makes a "good picture"? And how could anyone think those old styles were actually good? Soft-focus yearbook photos from the '80s are now hopelessly—and happily—outdated, as are the low-angle portraits fashionable in the 1940s or the blank stares of the 1840s. From portraits to products, landscapes to food pics, *Good Pictures* proves that the history of photography is a history of changing styles. In a series of short, engaging essays, Kim Beil uncovers the origins of fifty photographic trends and investigates their original appeal, their decline, and sometimes their reuse by later generations of photographers. Drawing on a wealth of visual material, from vintage how-to manuals to magazine articles for working photographers, this full-color book illustrates the evolution of trends with hundreds of pictures made by amateurs, artists,

and commercial photographers alike. Whether for selfies or sepia tones, the rules for good pictures are always shifting, reflecting new ways of thinking about ourselves and our place in the visual world.

Photography, Anthropology and History examines the complex historical relationship between photography and anthropology, and in particular the strong emergence of the contemporary relevance of historical images. Thematically organized, and focusing on the visual practices developed within anthropology as a discipline, this book brings together a range of contemporary and methodologically innovative approaches to the historical image within anthropology. Importantly, it also demonstrates the ongoing relevance of both the historical image and the notion of the archive to recent anthropological thought. As current research rethinks the relationship between photography and anthropology, this volume will serve as a stimulus to this new phase of research as an essential text and methodological reference point in any course that addresses the relationship between anthropology and visuality.

The History and Practice of the Art of Photography by Henry Hunt Snelling

This book studies the relationship between photography and history in colonial Southern Africa, using a series of encounters with Southern African photographic archives to reflect on photography as a distinct historical form. Through use of private and public archives, images produced by African itinerant photographers, white settlers, and colonial state institutions, this book explores the relationship between photography and history in colonial Southern Africa. Late nineteenth century Cape Colonial prison albums, police photographs from German Southwest Africa, African studio portraits, identity documents, travel permits and passports from the 1920s and 1930s, visual studies of whiteness and blackness authored by settler photographers, South African dompas photographs from the 1950s and 1960s, and aerial photography from the Eastern Cape in the mid-twentieth century are examined to highlight the ways in which photographic images cut across conventional institutional boundaries and complicate rigid distinctions between the private and the public, the political and the aesthetic, the colonial and the vernacular, or the subject and the object. *Photography and History in Colonial Southern Africa* argues that rather than understanding photographs as a means of preserving and recreating the past in the present, we can value them for how they evoke at once the need for and the limits of historical reconstruction. This book will be of interest to students and scholars of colonial history, photographic history, visual media, and African studies.

In this book, the authors explore and discuss the development of one of the most interesting and dynamic of photographic genres. Hailed as a landmark work when it was first published in 1994, *Bystander* is widely regarded by street photographers as the "bible" of street photography. It covers an incredible array of talent, from the unknowns of the late 19th century to the acknowledged masters of the 20th, such as Atget, Stieglitz, Strand, Cartier-Bresson, Brassai, Kertesz, Frank, Arbus, Winogrand, and Levitt to name just a few. In this new and fully revised edition, the story of street photography is brought up to date with a re-evaluation of some historical material, the inclusion of more contemporary photographers, and a discussion of the ongoing rise of digital photography.

A collection of entries that help chronicle the history of photography, explaining the different techniques that have been used and defining the common terms used in the field.

Through a carefully curated selection of quotations, images and interviews, *Photographers on Photography* reveals what matters most to the masters. With enlightening text by Henry Carroll, author of the internationally bestselling *Read This If You Want To Take Great Photographs* series, you'll discover how the giants of the genres developed their distinctive visual styles, the core ideas that underpin their practice and, most importantly, what photography means to you.
