Fighting in the Jim Crow Army is filled with first-hand accounts of everyday life in 1940s America. The soldiers of the 92nd and 93rd Infantry Divisions speak of segregation in the military and racial attitudes in army facilities stateside and abroad. The individual battles of black soldiers reveal a compelling tale of discrimination, triumph, resistance, and camaraderie. What emerges from the multitude of voices is a complex and powerful story of individuals who served their country and subsequently made demands to be recognized as full-fledged citizens. Morehouse, whose father served in the 93rd Infantry Division, has built a rich historical account around personal interviews and correspondence with soldiers, National Archive documents, and military archive materials. Augmented with historical and recent photographs, Fighting in the Jim Crow Army combines individual recollections with official histories to form a vivid picture of life in the segregated Army. In the historiography of World War II very little has emerged from the perspective of the black foot soldier. Morehouse allows the participants to tell the tale of the watershed event of their participation in World War II as well as the ongoing black freedom struggle.

The Petty Officer's Guide is written and edited by petty officers for petty officers. It is designed to ensure Navy Petty Officers are ready to fight and win wars at sea, under the sea, in the air, on land, and in outer space and cyberspace by exposing junior Petty Officers to innovative and modern leadership methodologies. Serving as the premiere leadership guide to junior Navy Petty Officers, it enhances development processes and tools such as the Navy Leader Development Framework, Education for Sea Power, Sailor 360, and Enlisted Leader Development courses. Furthermore,

Also it provides valuable background for specialist nurses, counsellors, social scientists, ethicists as well as genetics laboratory staff.

Many pilots and flight observers of the 7 Squadron, one of the helicopter squadrons of the naval air service of the Royal Netherlands Navy (RNN), often tell us the following story: About fifteen years ago a pilot of a Lynx helicopter was about to land on the helicopter landing platform of a frigate. There was a fierce wind blowing and the sea was rather choppy. The usual procedure under such weather conditions is to keep the ship in a geographically fixed position so that it lies more or less still, to give the pilot and the flight observer the possibility to land safely. This however, did not happen this time. After the helicopter had.

March 1942. Java is about to fall. An Australian military dispatch rider and a Dutch air force transport pilot embark on a frightening escape from the advancing Japanese that takes them from Bandung to a crash landing just north of Darwin. Both would later join a unique band of flyers determined to strike back at the enemy. Bomber Boys is the extraordinary and little known story of more than 100 Dutch airmen, stranded in Australia with no country

to return to, who were joined by a contingent of Australians to make up the RAAF's No. 18 (Netherlands East Indies) Squadron. Formed in Canberra in April 1942, the squadron flew operational coastal patrols before eventually being relocated to the secret MacDonald Airfield, north of Pine Creek in the Northern Territory, and eventually Batchelor, near Darwin. This is, however, more than a story about the 900 bombing raids, reconnaissance missions and attacks on Japanese shipping that the squadron flew in its three years of existence under Australian control. At its heart, is a powerful and compelling story of a group of very different men, thrown together for a common purpose, and the strange and sometimes difficult friendships they formed.

military analysis of the Iraq campaigns, *Blood, Metal and Dust* is the first authoritative military history of the wars in Iraq and Afghanistan to tell the detailed story of what happened on the ground. From the high-ranking officer who wrote the still-classified British military analysis of the war in Iraq comes the authoritative history of two conflicts which have overshadowed the beginning of the 21st century. Inextricably linked to the ongoing 'War on Terror', the wars in Iraq and Afghanistan dominated more than a decade of international politics, and their influence is felt to this day. *Blood, Metal and Dust* is the first military history to offer a comprehensive overview of the wars in Afghanistan and Iraq, providing in-depth accounts of the operations undertaken by both US and UK forces. Brigadier Ben Barry explores the wars which shaped the modern Middle East, providing a detailed narrative of operations as they unfolded. With unparalleled access to official military accounts and extensive contacts in both the UK and the US militaries, Brigadier Barry is uniquely placed to tell the story of these controversial conflicts, and offers a rounded account of the international campaigns which irrevocably changed the global geopolitical landscape.

By enrolling in this self-study course, you have demonstrated a desire to improve yourself and the Navy. Remember, however, this self-study course is only one part of the total Navy training program. Practical

Diversity, inclusion, and equal opportunity are three

terms that are often used interchangeably; however, there are some differences in how they are interpreted and applied between the Department of Defense (DOD) and civilian organizations. In the past few decades there have been rapid changes to certain laws and policies regarding diversity, inclusion, and equal opportunity in the Armed Forces. Since 2009, DOD policy changes and congressional actions have allowed individuals who are gay to serve openly with recognition for their same-sex spouses as dependents for the purpose of military benefits and opened all combat assignments to women. On June 30, 2016, DOD announced the end of restrictions on service for those transgender troops already openly serving. However, in August of 2017, President Donald J. Trump directed DOD to (1) continue to prohibit new transgender recruits, (2) review policies on existing transgender servicemembers, and (3) restrict spending on surgical procedures related to gender transition. Military manpower requirements derive from National Military Strategy and are determined by the military services based on the workload required to deliver essential capabilities. Some argue that to effectively deliver these capabilities a workforce with a range of backgrounds, skills and knowledge is required. Those who support broader diversity and equal-opportunity initiatives in the military contend that a more diverse force is a better performing and more efficient force. They point out that the nature of modern warfare has been shifting, requiring a range of new skills and competencies, and that these skills may be found in a more diverse cross-section of American youth. Some

argue that historically underrepresented demographic groups continue to be at a disadvantage within the military and that efforts should be intensified to ensure equal opportunity for individuals in those groups. Some also contend that if the military is to remain competitive with private-sector employers in recruiting a skilled workforce, DOD should offer the same equal-opportunity rights and protections that civilian employees have. Others oppose the expansion of diversity to include non-traditional gender identification because they fear it would undermine military cohesion and effectiveness, and would not accurately reflect American society as a whole.

AirmanU. S. Navy Nonresident Training Course "Soldiers in the 21st century must possess the knowledge, skills, and other attributes to perform effectively in complex technical, information-rich environments. This study, Development of a Prototype Self-Assessment Program in Support of Soldier Competency Assessment, was conducted as a counterpart to the U.S. Army Research Institute for the Behavioral and Social Sciences' (ARI) Performance Measures for 21st Century Soldier Assessment (PerformM21). PerformM21 is a 3-year feasibility effort to identify viable approaches for an operational performance assessment system for Army enlisted personnel. In this study, the researchers identified the design and content of a self-assessment system (SAS) that would (a) help Soldiers feel confident about testing, (b) inform Soldiers about the junior noncommissioned officer (NCO) promotion system, and (c) familiarize

Soldiers with the duties and responsibilities of NCOs. Information about best practices in the field of self-assessment/test preparation including what is done in the other Armed Services, academia, and the test industry was used to develop a prototype SAS that would explore the realm of test preparation functions, actions, and items that a typical Soldier would encounter during this phase. The prototype SAS reflects PerformM21 test parameters; it is web-based, targeted to E4 Soldiers, and focuses on the Army-wide core assessment."--P. i.

Members of the naval service will find that at all points in their careers they can expect to be involved to some extent in the planning and execution c~official ceremonies and social events. Protocol is a code of established guidelines on proper etiquette and precedence which, when followed, lays the foundation for a successfid event. From this foundation, the host should consider the facets which make a particular situation unique, and fi-om there, use imagination to design a memorable occasion. The most important consideration in planning should always be the comfort of one's guests. A clever hostlhostess is able to reach a proper mixture of protocol and common sense that will enable guests to enjoy themselves completely. If this is accomplished, an event is truly successful.

In this volume, we examine the challenges and opportunities created by global migration at the start of the 21st century. Our focus extends beyond economic impact to questions of international law, human rights, and social and political incorporation. We examine immigrant outcomes and policy questions at the global,

national, and local levels. Our primary purpose is to connect ethical, legal, and social science scholarship from a variety of disciplines in order to raise questions and generate new insights regarding patterns of migration and the design of useful policy. While the book incorporates studies of the evolution of immigration law globally and over the very long term, as well as considerations of the magnitude and determinants of immigrant flows at the global level, it places particular emphasis on the growth of immigration to the United States in the 1990s and early 2000s and provides new insights on the complex relationships between federal and state politics and regulation, popular misconceptions about the economic and social impacts of immigration, and the status of 'undocumented' immigrants.
