Students preparing to take the GMAT will find that this book gives the help they need to excel on the test's math section. Separate chapters review the fundamentals of arithmetic, algebra, and geometry. Another chapter gives special attention to the test's often-perplexing word problems, with advice on translating a problem's words into a specific equation. A final chapter focuses on the data sufficiency question type, which is new to many test takers. Every chapter in the book is filled with plenty of practice problems and detailed solutions. Two full-length model tests are included for further practice. The author also offers helpful advice on test preparation and test-taking tips and strategies.

Born Liquid is the last work by the great sociologist and social theorist Zygmunt Bauman, whose brilliant analyses of liquid modernity changed the way we think about our world today. At the time of his death, Bauman was working on this short book, a conversation with the Italian journalist Thomas Leoncini, exactly sixty years his junior. In these exchanges with Leoncini, Bauman considers, for the first time, the world of those born after the early 1980s, the individuals who were 'born liquid' and feel at home in a society of constant flux. As always, taking his cue from contemporary issues and

debates, Bauman examines this world by discussing what are often regarded as its most ephemeral features. The transformation of the body – tattoos, cosmetic surgery, hipsters – aggression, bullying, the Internet, online dating, gender transitions and changing sexual preferences are all analysed with characteristic brilliance in this concise and topical book, which will be of particular interest to young people, natives of the liquid modern world, as well as to Bauman's many readers of all generations.

Helps students to develop the thinking skills required for success in the BMAT, which is required by seven universities for entrance onto competitive courses, such as medicine and veterinary science.

Complete IELTS combines the very best in contemporary classroom practice with stimulating topics aimed at young adults wanting to study at university.
