Is citizenship simply a legal status or does it describe a sense of belonging to a national community? For Arab Americans, these questions took on new urgency after 9/11, as the cultural prejudices that have often marginalized their community came to a head. *Citizenship and Crisis* reveals that, despite an ever-shifting definition of citizenship and the ease with which it can be questioned in times of national crisis, the Arab communities of metropolitan Detroit continue to thrive. A groundbreaking study of social life, religious practice, cultural values, and political views among Detroit Arabs after 9/11, *Citizenship and Crisis* argues that contemporary Arab American citizenship and identity have been shaped by the chronic tension between social inclusion and exclusion that has been central to this population's experience in America. According to the landmark Detroit Arab American Study, which surveyed more than 1,000 Arab Americans and is the focus of this book, Arabs express pride in being American at rates higher than the general population. In nine wide-ranging essays, the authors of *Citizenship and Crisis* argue that the 9/11 backlash did not substantially transform the Arab community in Detroit, nor did it alter the identities that prevail there. The city's Arabs are now receiving more mainstream institutional, educational, and political support than ever before, but they remain a

constituency defined as essentially foreign. The authors explore the role of religion in cultural integration and identity formation, showing that Arab Muslims feel more alienated from the mainstream than Arab Christians do. Arab Americans adhere more strongly to traditional values than do other Detroit residents, regardless of religion. Active participants in the religious and cultural life of the Arab American community attain higher levels of education and income, yet assimilation to the American mainstream remains important for achieving enduring social and political gains. The contradictions and dangers of being Arab and American are keenly felt in Detroit, but even when Arab Americans oppose U.S. policies, they express more confidence in U.S. institutions than do non-Arabs in the general population. The Arabs of greater Detroit, whether native-born, naturalized, or permanent residents, are part of a political and historical landscape that limits how, when, and to what extent they can call themselves American. When analyzed against this complex backdrop, the results of The Detroit Arab American Study demonstrate that the pervasive notion in American society that Arabs are not like “us” is simply inaccurate. *Citizenship and Crisis* makes a rigorous and impassioned argument for putting to rest this exhausted cultural and political stereotype. College sophomore Hannah Maquiling doesn't know

why everyone tells her their love problems. She's never even had a boyfriend, but that doesn't stop people from spilling their guts to her, and asking for advice. So maybe it shouldn't be a surprise when the cutest guy in school tells her that she's going to have to take on this responsibility -- but for all humanity. The Goddess of Love has gone AWOL. It's a problem, because her job is to keep in check this world's obsession with love (and lack of it). The God of the Sun, for now an impossibly handsome senior at an exclusive college just outside of Metro Manila, thinks Hannah has what it takes to (temporarily) do the job. While she's learning to do this goddess thing, she practices on the love troubles of shy Kathy, who's got a secret admirer on campus. Hannah's mission, should she choose to accept it, is to make sure that he's not a creepy stalker and they find their happily ever after -- or at least something that'll last until next semester. (As if she could refuse! The Sun God asked so nicely. And he's so, well, hot.)

Although competitiveness is typically associated with firms, they are not the only organizational body whose performance is dependent upon competitiveness. This poignant and insightful book focuses on how the varied economic performance of cities and regions, both within nations as well as across nations, during the era of the ÔGreat RecessionÕ also highlights the need for competitiveness. Competitive cities and regions enjoy a superior economic performance, while their less competitive counterparts experience poorer economic growth and increasing unemployment. Using leading frameworks, this study provides applications and case studies about what shapes the competitiveness of places in an international context. Specific policies that enhance local competitiveness are identified and analyzed. Scholars of regional economics, urban economics, urban planning and public policy as well as policymakers will find plenty of invaluable information in this invigorating book.

Illustrated with striking Pompeian depictions of these ancient combatants, *Gladiators at Pompeii* presents a complete picture of the gladiators of the Roman Empire and the highly organized and regulated tournaments in which they competed. Luciana Jabobelli reveals the latest evidence on the best-documented categories of gladiators, their origins, social status, equipment, and training. Originally staged for the funeral rights of prominent Roman citizens, gladiatorial games eventually became a tool for career politicians to both gain popularity and appease the often turbulent masses.

While most gladiators were slaves or prisoners of war forced into a career of battle, others were criminals or free men from prominent families who aspired to fame and fortune.

Surprisingly, there are even records of women gladiators.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read

in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The church of Jesus Christ finds itself at a very unique moment in history. The average Christian living in the “economically advanced countries” enjoys a level of prosperity that has been unimaginable for most of human history. At the same time, over 2.5 billion people in the Majority World (Africa, Asia, and Latin America) live on less than \$2 per day, with many of these people being Christians. Ironically, it is amongst the “least of these” in the Global South that the global church is experiencing the most rapid growth. All of this raises profound challenges to the global church. How can churches and missionaries in the Majority World effectively address the devastating poverty both inside their congregations and just outside their doors? How can churches in the economically advanced countries effectively partner with Global South churches in this process? The very integrity of the global church’s testimony is at stake, for where God’s people reside, there should be no poverty (Deuteronomy 15:4; Acts 4:34). For the past several decades, microfinance (MF) and microenterprise development (MED) have been the leading approaches to poverty alleviation. MF/MED is a set of interventions that allow households to better manage their finances and start small businesses. From remote churches in rural Africa to the short-term missions programs of mega-churches in the United States, churches and missionaries have taken the plunge into MF/MED, trying to emulate the apparent success of large-scale relief and development organizations. Unfortunately, most churches and missionaries find this to be far more

difficult than they had imagined. Repayment rates on loans are low and churches typically end up with struggling programs that require ongoing financial subsidies. Everybody gets hurt in the process: donors, relief and development agencies, churches and missionaries, and—most importantly—the poor people themselves. This book explains the basic principles for successfully utilizing microfinance in ministry. Drawing on best practice research and their own pioneering work with the Chalmers Center, Brian Fikkert and Russell Mask chart a path for churches and missionaries to pursue, a path that minimizes the risks of harm, relies on local resources, and enables missionaries and churches to minister in powerful ways to the spiritual and economic needs of some of the poorest people on the planet. The insights of microfinance can play a tremendous role in helping to stabilize poor households, removing them from the brink of disaster and enabling them to make the changes that are conducive to long-term progress. Moreover, when combined with evangelism and discipleship, a church-centered microfinance program can be a powerful tool for holistic ministry—one that is empowering for the poor and devoid of the dependencies plaguing most relationships between churches in economically advanced countries and churches in poor nations.
