The global automotive industry faces the most influential changes since the revolutionary introduction of mass production a century ago. Latecomer firms from Asia are challenging the western incumbents. They can change the rules of the game in the industry by leapfrogging several steps in their development process. This study seeks to contribute to the discussion of latecomer firms by gaining insights into the catch up processes of five automotive companies in the passenger car segment, namely BYD (PRC), Chery (PRC), Geely (PRC), Tata Motors (India) and Mahindra & Mahindra (India). Based on learning theories and the core processes of car manufacturers, the author develops a catch up framework in order to compare automotive latecomers. The Korean manufacturer Hyundai serves as an example for a successful catch up, and provides a contextual framing for catch up processes in the automotive sector. An analysis of empirical data provides evidence for the evaluation of the catch up status of the five challenger firms. The author emphasizes the influence of institutional settings in China and India and the role of business groups that can act as facilitators for the catch up process. Finally, the study clusters the catch up strategies of the five observed companies in order to compare their approach.

This volume is excellent. Students who are interested in Asian business should read it and will find the comprehensive bibliography offered by the different

contributors very helpful. In light of the recent global financial crises, it is time to re-examine the Asian miracles, as well as the Western models of business organizations and regulations. This volume offers great insights not just on Asian business but also on Western economies and business. It is also time to adopt an integrative approach recommended by Yeung through comparative research of businesses and economies in different institutions and cultures. Yifei Sun, *Economic Geography* An absolute must-have for college library reference shelves, filled cover-to-cover with keen analyses that any businessperson seeking to make inroads in an Asian market needs to study at length!

Midwest Book Review This book serves as an important guide to the many fascinating research questions about Asian business waiting to be addressed. The study of Asian business has reached equality in importance to the study of business in Europe and North America. Researchers who study any of these regions have an incentive to follow the study of business in the other regions, if for no other reason than that many global firms from each region operate in all regions now. Nonetheless, the more important reason for knowledge transfer among researchers of each region is that these exchanges can only advance everyone's research. Henry Yeung and the contributors are to be thanked for setting out a rich agenda for research on Asian business that will elevate this study to equality with research elsewhere in the world. *Eurasian Geography and Economics* This book is extremely comprehensive and well researched. It will be of particular interest to

scholars in the fields of international business, development studies, economic geography, regional studies as well as international and national policymakers. Science Technology & Society The rise of Asia as an important region for global business has been widely recognized as one of the most significant economic phenomena in the new millennium. This accessible and comprehensive Handbook brings together state-of-the-art reviews of Asian business in an expansive range of areas including: business organizations strategic management marketing state business relations business and development business policy issues. It is argued that whilst academic studies on Asian business have been in existence for over two decades, there is relatively little systematic integration of our knowledge and research on Asian business. The contributors, drawn from a variety of disciplines within the social sciences, aim to redress the balance with their lively, cutting-edge discussion. Serving as a timely overview of more than two decades of scholarly research, this Handbook will be an essential resource for academics, students and researchers interested in Asian business.

In this groundbreaking guide, former investment banker Philippe Espinasse explains the process of gathering cornerstone investors in connection with IPOs and other equity offerings. Using his trademark simple and jargon-free language, he details the targeting strategies, documentation, marketing, and allocation of shares and other securities to these reference shareholders, and analyses why and how they make or break today's new listings across Asia's key markets. This essential guide—and the first of its kind—contains key information on the legal framework for cornerstone investors in Hong Kong, Malaysia, and Singapore, and offers practical advice on how best to structure and conduct a cornerstone investor offering. It also

discusses some of the more controversial issues associated with the practice of cornerstone investment and includes many real-life examples of cornerstone deals, sample documents, cornerstone investor profiles, an investor target list, and a comprehensive glossary. 'There is no better person to shed light on the opaque world of cornerstone investing in Asian IPOs. Philippe Espinasse writes clearly, substantively, and expertly.' —Jasper Moiseiwitsch, Asia companies and markets news editor, Financial Times 'As engaging as it is informative. Espinasse has cut through legalese and jargon to create a pragmatic overview of this widely misunderstood, and distinctly Asian, investment banking concept. Packed with recent examples, this book doesn't just teach you about cornerstones; it also provides an insider's take of the region's capital markets hubs.'

—Danielle Myles, capital markets editor, The Banker 'Cornerstone investors have taken centre stage in Hong Kong's IPO market. This book is needed now more than ever.' —Matthew Thomas, Asia bureau chief, Euromoney Institutional Investor

From the 1970s onward, "exploitation cinema" as a concept has circulated inside and outside of East Asian nations and cultures in terms of aesthetics and marketing. However, crucial questions about how global networks of production and circulation alter the identity of an East Asian film as "mainstream" or as "exploitation" have yet to be addressed in a comprehensive way. Exploiting East Asian Cinemas serves as the first authoritative guide to the various ways in which contemporary cinema from and about East Asia has trafficked across the somewhat-elusive line between mainstream and exploitation. Focusing on networks of circulation, distribution, and reception, this collection treats the exploitation cinemas of East Asia as mobile texts produced, consumed, and in many ways re-appropriated

across national (and hemispheric) boundaries. As the processes of globalization have decoupled products from their nations of origin, transnational taste cultures have declared certain works as “art” or “trash,” regardless of how those works are received within their native locales. By charting the routes of circulation of notable films from Japan, China, and South Korea, this anthology contributes to transnationally-accepted formulations of what constitutes “East Asian exploitation cinema.”

This comprehensive volume explores the remarkable expansion of higher education systems and institutions in Asia in recent decades, alongside changing forms of consumerism, mobility and global economic conditions. It demonstrates how recent changes in training, education and employment have sparked new aspirations for possible and desirable livelihoods among the younger generation, while also generating fresh problems and tensions. The authors in this volume critically interrogate the links between education and employment; normative understandings about youth and adulthood; as well as personal, national and regional level aspirations for economic 'success'. Collaboration in business allows for equitable opportunities and inclusive growth as the economy rises while also permitting partnering organizations to adopt and utilize the latest successful practices and management. However, a market in stasis may require a displacement in order to allow businesses to grow and create new alliances and partnerships toward a shared economy. There is a need for studies that seek to understand the necessity of market disruption and the best supervisory methods for remaining relevant and profitable in a time of change. *The Handbook of Research on Managerial Practices and Disruptive Innovation in Asia* is an

A state-of-the-art, one-stop resource, *Public Administration in South Asia: India, Bangladesh, and Pakistan* examines public administration issues and advances in the Indian subcontinent. The book fulfills a critical need. These nations have the largest public administration programs in South Asia, yet existing knowledge on them is fragmented at best. Bringing together leading scholars from these countries, this book provides both an insider perspective and a scholarly look at the challenges and accomplishments in the region. Focusing on the machinery of government, the book explores questions such as: What is the history of public administration development? How are major decisions made in the agencies? Why are anti-corruption efforts so much a challenge? What is the significance of intergovernmental relations? What is the success of administrative reform? What are

examples of successful social development programs? How successful is e-government, and what are its challenges? Why is civil service reform difficult to achieve? How is freedom of information being used as a means to combat corruption and invoke grassroots activism? What can be learned from the successes and failures? While public administration practice and education have become considerably professionalized in the last decade, a sufficiently in-depth and well-rounded reference on public administration in these countries is sorely lacking. Most available books tackle only aspects of public administration such as administrative reforms, civil service, economic developments, or public policy, and are country specific. None provide the in-depth analysis of the sphere of public action in South Asia found in this book. It supplies an understanding of how public administration can be either the source of, or solution to, so many of the problems and achievements in the Indian subcontinent.
