The most effective leader behaves more like a coach Authors Bill Eckstrom and Sarah Wirth have spent a decade researching the activities, behaviors, and performance of leaders. After studying more than 100,000 coaching interactions in the workplace, primarily of sales teams, they have been able to determine how coaching affects team outcomes and growth. The authors share three critical performance drivers, along with the four high-growth activities that coaches must execute to build a team that is motivated to achieve at the highest levels. Through both hard data and rich stories, Eckstrom and Wirth demonstrate how leaders can measure and improve their coaching to lead their teams to better results. The Coaching Effect will help leaders at all levels understand the necessity of challenging people out of their comfort zone to create a high-growth organization. Leaders will learn how they can develop trust relationships, drive accountability and leverage growth experiences to propel their team members to the highest levels of success.

In The Perfect Leadership Triad, Eric Turbiville educates executives about the importance of putting employees before the business, coaching employees to improve competencies and performance, and holding employees accountable to perform at a high level. Great leaders focus on people, coaching and performance. Turbiville combines his experience as a former Fortune 500 executive, a credentialed executive coach, and a leader of many high-performing teams, to help readers grow into more impactful leaders. Drawing on his own experience as an executive and coach, combined with many examples from the business world, Turbiville provides the formula to excel as a business leader. He shows that the most effective executives are people-focused, coaching-centered, and performance-driven. Great organizations and leaders put their employees before the customers. Data confirms that happy, engaged employees result in happy customers. In fact, when employees know you care about and respect them, they will buy into your vision and work harder for you. Coaching employees is the most important thing a leader can do to heighten performance, increase revenue, and guarantee employee engagement. The act of coaching employees engenders trust between the leader and employee, resulting in a relationship that is transparent, candid, and productive. If a leader cares about her people, she will hold them accountable for performance. Great leaders set clear, high expectations and focus on the process of accomplishing goals. When performance expectations are combined with effective coaching, employees and leaders will exceed expectations. No leader, organization, or culture is perfect. What executives strive for is excellence! Excellence follows when

leaders put people first, coach their employees, and expect high performance. The business world needs your leadership. Come on this journey as Eric Turbiville shows you how to drive and sustain high performance!

In the world of strength and conditioning, learning how to move others-not just physically, but also psychologically and emotionally-is paramount to getting the most out of them. People are the ultimate performance variable, and understanding how to effectively blend knowledge of proper training with the nuances of human behavior is integral to helping athletes achieve their ultimate goals. Unfortunately, while much attention has been given to the science of physical training, little attention has been given to the science of communication. Conscious Coaching: The Art and Science of Building Buy-In bridges this gap. Readers learn the foundational principles of improving relationships, enhancing engagement, and gaining the trust of athletes through targeted communication. And, every bit as important, readers also learn concrete strategies to apply these principles in day-to-day coaching situations they will inevitably encounter. The result is a game-changing book that sets the stage for coaches to create a culture of success not only within sport, but also beyond. Conscious Coaching is a movement and its time has come.

Coaching is an essential skill for leaders. But for most busy, overworked managers, coaching employees is done badly, or not at all. They're just too busy, and it's too hard to change. But what if managers could coach their people in 10 minutes or less? In Michael Bungay Stanier's *The Coaching Habit*, coaching becomes a regular, informal part of your day so managers and their teams can work less hard and have more impact. Coaching is an art and it's far easier said than done. It takes courage to ask a question rather than offer up advice, provide an answer, or unleash a solution. Giving another person the opportunity to find their own way, make their own mistakes, and create their own wisdom is both brave and vulnerable. It can also mean unlearning our "fix it" habits. In this practical and inspiring book, Michael shares seven transformative questions that can make a difference in how we lead and support. And, he guides us through the tricky part - how to take this new information and turn it into habits and a daily practice. -Brené Brown, author of *Rising Strong* and *Daring Greatly* Drawing on years of experience training more than 10,000 busy managers from around the globe in practical, everyday coaching skills, Bungay Stanier reveals how to unlock your peoples' potential. He unpacks seven essential coaching questions to demonstrate how---by saying less and asking more--you can develop coaching methods that produce great results. - Get straight to the point in any conversation with *The Kickstart Question* - Stay on track during any interaction with *The AWE Question* - Save hours of time for yourself with *The Lazy Question*, and hours of time for others with *The Strategic Question* - Get to the heart of any interpersonal or external challenge with *The Focus Question* and *The Foundation Question* - Finally, ensure others find your coaching as beneficial as you do with *The Learning Question* A fresh, innovative take on the traditional how-to manual, the book combines insider information with research based in neuroscience and behavioural economics, together with interactive training tools to turn practical advice into practiced habits. Dynamic question-and-answer sections help identify old habits and kick-start new behaviour, making sure you get the most out of all seven chapters. Witty and conversational, *The Coaching Habit* takes your work--and your workplace--from good to great.

This book lucidly illustrates how a leader can bring out the very best in people by coaching them, and how coaching can unleash creativity as well as innovation while inspiring teams to play to their potential. It also examines how coaching helps leaders maintain a fine balance between managing and guiding, and between appraising and supporting their teammates. While many excellent books have been written about leadership, talent and coaching, this is a rare book that stands boldly at the intersection of leadership and coaching. This is a book for our times. Businesses are facing a new reality, characterized by a VUCA (volatile, uncertain, complex and ambiguous) world. This new reality has forced organizations to depart from conventional command-and-control practices to a completely new model - a model in which leaders support and guide, rather than instruct and control, their team members. Exploring some of the key ingredients of impactful leadership, *Coaching* offers tips and tricks, backed by research and incisive insights, on how to become an effective leader-coach. Peppared with interesting anecdotes and analogies, drawn from sports, performing arts and other walks of life, the book is a breezy read. Interviews with corporate leaders and academics further enrich the narrative. Guaranteed to make for a very interesting read, the book will be useful to leaders, aspiring leaders and especially those that wish to transition from being just good leaders to extraordinary ones.

Do you have the leadership skills you need to solve problems, reach goals, and develop others? The COACH Model® is a radically different

ICF Professional Certified Coach and speaker Keith Webb teaches Christian leaders how to create powerful conversations to assist others to solve their own problems, reach goals, and develop their own leadership skills in the process. Whether leaders are working with employees, teenagers, or a colleague living in another city, they'll find powerful tools and techniques to increase leadership effectiveness. From a founding member of the coaching movement comes a detailed guide to mastering one of a coach's toughest skills: thoughtfully reflecting clients' words and expressions back to them so they see themselves and their world through new eyes. "Coaches rely far too much on asking open-ended questions," says Marcia Reynolds. But questions only seek answers—inquiry provides insight. When, instead of just questions, clients hear their thoughts, opinions, and beliefs spoken by someone else, it prompts them to critically consider how their thinking affects their goals. Reynolds cites the latest brain science to show why reflective inquiry works and provides techniques, tips, and structures for creating breakthrough conversations. This book will free coaches from the cult of asking the magical question by offering five essential practices of reflective inquiry: focus on the person, not the problem; summarize what is heard and expressed; identify underlying beliefs and assumptions; unwrap the desired outcome; and articulate insights and commitments. Using these practices, combined with a respectful and caring presence, helps create a space where clients feel safe, seen, and valued for who they are. Coaches become change agents who actively recharge the human spirit. And clients naturally dive deeper and develop personalized solutions that may surprise even the coach. Clear, concise, hands-on, and reader friendly, this is a coaching guide written in a coaching style.

The coauthors of the bestselling *Peak Performance* dive into the fascinating science behind passion, showing how it can lead to a rich and meaningful life while also illuminating the ways in which it is a double-edged sword. Here’s how to cultivate a passion that will take you to great heights—while minimizing the risk of an equally great fall. Common advice is to find and follow your passion. A life of passion is a good life, or so we are told. But it's not that simple. Rarely is passion something that you just stumble upon, and the same drive that fuels breakthroughs—whether they're athletic, scientific, entrepreneurial, or artistic—can be every bit as destructive as it is productive. Yes, passion can be a wonderful gift, but only if you know how to channel it. If you're not careful, passion can become an awful curse, leading to endless seeking, suffering, and burnout. Brad Stulberg and Steve Magness once again team up, this time to demystify passion, showing readers how they can find and cultivate their passion, sustainably harness its power, and avoid its dangers. They

ultimately argue that passion and balance--that other virtue touted by our culture--are incompatible, and that to find your passion, you must lose balance. And that's not always a bad thing. They show readers how to develop the right kind of passion, the kind that lets you achieve great things without ruining your life. Swift, compact, and powerful, this thought-provoking book combines captivating stories of extraordinarily passionate individuals with the latest science on the biological and psychological factors that give rise to—and every bit as important, sustain—passion.

You're trying to help--but is it working? Helping others is a good thing. Often, as a leader, manager, doctor, teacher, or coach, it's central to your job. But even the most well-intentioned efforts to help others can be undermined by a simple truth: We almost always focus on trying to "fix" people, correcting problems or filling the gaps between where they are and where we think they should be. Unfortunately, this doesn't work well, if at all, to inspire sustained learning or positive change. There's a better way. In this powerful, practical book, emotional intelligence expert Richard Boyatzis and Weatherhead School of Management colleagues Melvin Smith and Ellen Van Oosten present a clear and hopeful message. The way to help someone learn and change, they say, cannot be focused primarily on fixing problems, but instead must connect to that person's positive vision of themselves or an inspiring dream or goal they've long held. This is what great coaches do--they know that people draw energy from their visions and dreams, and that same energy sustains their efforts to change, even through difficult times. In contrast, problem-centered approaches trigger physiological responses that make a person defensive and less open to new ideas. The authors use rich and moving real-life stories, as well as decades of original research, to show how this distinctively positive mode of coaching—what they call "coaching with compassion"—opens people up to thinking creatively and helps them to learn and grow in meaningful and sustainable ways. Filled with probing questions and exercises that encourage self-reflection, *Helping People Change* will forever alter the way all of us think about and practice what we do when we try to help.
