From the New York Times bestselling creators of Click, Clack, Moo, comes an entertaining introduction to politics. My fellow Americans: It is our pleasure, our honor, our duty as citizens to present to you Duck for President. Here is a duck who began in a humble pond. Who worked his way to farmer. To governor. And now, perhaps, to the highest office in the land. Some say, if he walks like a duck and talks like a duck, he is a duck. We say, if he walks like a duck and talks like a duck, he will be the next president of the United States of America. Thank you for your vote.

Eureka Math is a comprehensive, content-rich PreK–12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way

that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. This one-of-a-kind resource will be invaluable to every teacher educator, every curriculum director, and every literacy coach, whether or not they must meet Common Core Standards. Bringing together perspectives from literacy luminaries, each addressing their specialty, this book offers an accessible fund of rich practices in literacy instruction. The book serves two purposes: First, it assembles a body of knowledge and wisdom from leading literacy researchers who each draw from a long career in the field to address topics of central

importance to good literacy instruction. Second, these research-to-practice leaders connect established best practices and foundational research to the current challenge of instruction to meet Common Core Standards and other rigorous curriculum guidelines. The contributors point out strengths of the Common Core as well as issues and oversights that educators should be aware of. Closing chapters situate the Common Core within a continuum of educational policy and legislation. Contributors: Richard L. Allington, Monica T. Billen, Jay S. Blanchard, Robert Calfee, Gina N. Cervetti, Michael F. Graves, John T. Guthrie, Elfrieda H. Hiebert, James V. Hoffman, Rosalind Horowitz, Michael L. Kamil, Barbara Kapinus, Richard Long, Leigh Ann Martin, Kimberly McCuiston, James Nageldinger, David Paige, P. David Pearson, Timothy Rasinski, S. Jay Samuels, Barbara Taylor, Joanna P. Williams, Kathleen Wilson “Pearson and Hiebert have long advocated for children in schools, and this volume is no exception. They and their chapter authors situate the CCSS within the historical and policy context in which it was written and support the literacy education community as we wrestle with the implications the standards have for research, for teachers, for teaching, and for learning.” —Sharon Walpole, University of Delaware “This book gets way beyond generalities and polemics about the Common Core, taking a deep and measured dive into a wide range of essential topics within the standards. I read a

lot, and I can't think of the last time I read anything about the CCSS as engaging and thought provoking as this.” —Nell K. Duke, University of Michigan

This is a methods book for elementary majors and preservice/beginning elementary teachers. It takes a very practical approach to learning to teach elementary school mathematics in an emerging Age of the Common Core State Standards. The Common Core State Standards in Mathematics (CCSSM) is not meant to be “the” official mathematics curriculum; it was purposefully developed

primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace. A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the kindergarten through grade 5 portions of the CCSSM first, with issues in content-practice assessment, learning, teaching, and classroom management pursued next and in that order. In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content-practice learning, teaching, and assessment. The CCSSM content standards, which pertain to mathematical knowledge, skills, and applications, have been carefully crafted so that they are teachable, learnable, coherent, fewer, clearer, and higher. The practice standards, which refer to institutionally valued mathematical actions, processes, and habits, have been conceptualized in ways that will hopefully encourage all elementary students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation. Thus, in the CCSSM, proficiency in content alone is not sufficient, and so does practice without content, which is limited. Content and practice are both equally important and, thus, must come together in teaching, learning, and assessment in order to support authentic mathematical understanding. This blended,

multisourced text is a “getting smart” book. It helps elementary majors and preservice/beginning elementary teachers work within the realities of accountable pedagogy and develop a proactive disposition that is capable of supporting all elementary students in order for them to experience growth in mathematical understanding necessary for middle school and beyond, including future careers. In *Writers Are Readers*, the mutually supportive roles of reading and writing are made visible through the idea of “flipsides;” how a reader's insights can be turned around to provide insights into his own writing, and vice versa. Lester and Reba's trademark engaging style is woven throughout chapters full of sample lessons, student writing samples, and recommended texts for maximizing the flipped concept across the year. “Leading the student to understand what he did as a reader can become a lens that brings into focus what the writer had to do before a reader ever saw the page,” they write. Discover fresh new ways to turn reading strategies into writing opportunities that your students will be excited about and deeply understand.

The consensus among educators nationwide is that in-depth instruction paired with focused assessment of essential concepts and skills are far more effective than superficially covering every concept and skill in the standards. Educators are faced with the task of teaching all standards while meeting the extraordinary

range of student learning needs. Prioritizing the Common Core offers common sense solutions to the dilemmas teachers face today in implementing the new, more rigorous national standards. Chapters present a rationale for prioritizing the Common Core, a step-by-step process for prioritizing standards in language arts and mathematics, strategies for soliciting feedback and input from everyone in the district or school prior to the final determination of the Priority Standards, and detailed summaries of the process schools in six different districts used to identify their Priority Standards, with accompanying commentary by those who directed the work.
