Global consumption of raw materials currently goes beyond the earth's regenerative capacity, but the circular economy offers a more sustainable model which also provides new business opportunities. Mastering the Circular Economy is an introduction to circularity from a business and value chain management perspective. With many reflections and exercises throughout, the book draws a direct link between relevant recent theory and practice and offers students and practitioners a deeper understanding of the topic. It looks at both the macro and micro context of the circular economy, from the government and societal view to the impact of new business models in an individual company. Starting from the corporate imperative of moving from linear to circular business models, Mastering the Circular Economy covers the associated opportunities and challenges for organizations, from regulation and risk to value chain collaboration, reverse logistics and product quality. Part two of the book helps students to pull together everything they've learned and see how the concepts play out in the real world by guiding them through application in the online business simulation game The Blue Connection (free basic access is included with the book). Readers are continuously asked to reflect on the choices they would make in different roles to demonstrate a full understanding of the strategic and operational implications of the circular economy.

Migration has been a widely discussed and debated issue in recent years while events in Africa and the Arab world have caused migration on a huge scale and pushed the subject close to the top of the political agenda. Globalisation, climate change and demographic developments in the West provide a backdrop to the current discourses and policies on migration. There is a conflict between humanitarian impulses and protectionism. Recent decades have seen an increase in research and writing, in the UK and internationally, on the different aspects of migration. The increase in numbers and diversity of migrants is recognised as posing significant challenges and opportunities for social and public policies. Simultaneously the policy landscape on migrants entitlements to public services, as well as notions of social protection, are in a state of flux in the context of the adoption of austerity policies across the European Union and beyond. These trends have significant implications on access to services generally, including health and social care services. Philomena de Lima provides a contemporary understanding of migrants and migration processes and trends. She reviews the conceptual and theoretical discourses on integration and citizenship rights with a particular focus on issues related to migrants access to services, including health and social care services. The book will inform and educate social science students, policy-makers and those wrestling on a practical level with the implications of migration.
