Cost and Management Accounting-I' is designed in accordance with the latest CBCS syllabus as prescribed by the University of Calcutta and other major universities of Eastern India. It is primarily intended for Semester II of B.Com curriculum, besides being equally useful for the students of professional courses. The book presents the core concepts of accounting in a lucid and easy-to-understand language. It provides a right blend of theory and application to lay a solid foundation for the advanced aspects of Cost and Management Accounting,

not only for higher studies but also for corporate requirements. Emphasis on the explanation of Cost Accounting Standards and guidelines with comprehensive examples. Special focus on topics related to Employee Cost and Incentive Systems (Labour Costs), Accounting for Materials and Accounting for Overheads. Chapter-wise segregation of questions from last 10 years' (2008–17) question papers of the University of Calcutta—for general and honours courses.

Management accounting plays a vital decision-making role in today's lean organization. Techniques of Management Accounting is the first book to provide a practical, hands-on approach to its three key areas: full-cost accounting, differential cost accounting, and management control systems. Focusing less on line-item detail and more on real-world application, it provides managers with the tools they need to interpret key financial information and improve overall performance.

Cost Accounting, Stage 2 discusses the basic elements of cost, cost collection, and cost accounting techniques and methods. The book provides an introduction to the concept of cost accounting and tackles cost ascertainment and conversion costs. The text discusses the various types of costing such as job, process, marginal, and standards. A whole chapter is also dedicated to budgets, variance

learning platform for homework completion and review that helps improve student performance over a variety of critical outcomes while aiding instructor grading and assessment efficiency. Housed within Connect, SmartBook is an adaptive study tool that helps identify specific topics and learning objectives individual students need to study. As students read, SmartBook assesses comprehension and dynamically highlights where they need to focus more. The result is that students are more engaged with course content, can better prioritize their time, and come to class ready to participate. End-of-Chapter Material helps you apply the concepts in accounting and, in more comprehensive material, analyze the information to form business decisions. Assignable material includes exercises, problems and test bank material. Based on your instructor settings, you can receive instant feedback on your work either while working on an assignment or after the assignment is submitted for a grade.

Our primary reason for writing this book was to produce a text that can be easily understood by students and still provide comprehensive coverage of the topics generally found in a cost accounting text. To achieve this goal, we have included extensive illustrations in each chapter and eliminated unnecessary words and details. Every chapter includes the following additional sections to aid the student in understanding the subject matter: chapter review, glossary,

comprehensive summary problems with solutions, and assignment materials in the form of questions, multiple choice, exercises, and problems. Whenever applicable, assignment material was adapted from C.P.A. and C.M. A. examinations. Many chapters also include an appendix providing information beyond the scope of that which is normally presented in a cost accounting text. Fundamental concepts and techniques are covered in depth before a student is exposed to the more complex areas of cost accounting. To ensure a solid foundation, this text presents a thorough coverage of product costing. A second part, Cost Accounting: Concepts and Applications for Managerial Decision Making (which includes Chapter (followed by Chapter 14-24), deals mainly with performance evaluation and managerial decision making. We feel it is vital for students to have a thorough understanding of product costing before they can attempt to analyze the data produced from today's sophisticated cost accounting systems. The authors have kept the text concise by focusing on the key concepts students need to master. Opening vignettes & 'in action' boxes show realistic applications of these concepts throughout. Comprehensive end-of-chapter problems provide students with all the practice they need to fully learn each concept.

"Cost Management: A Strategic Emphasis," by Blocher/Stout/Cokins/Chen is the first cost accounting text to offer integrated coverage of strategic management topics in cost accounting. The text is written to help students understand more about management and the role of cost accounting in helping an organization succeed. This text aims to teach management concepts and methods, and to demonstrate how managers use cost management information to make better decisions and improve their organization's competitiveness. In teaching these key management skills, the text takes on a strategic focus. It addresses issues such as: "How does

a firm compete? What type of cost management information is needed for a firm to succeed? How does the management accountant develop and present this information?" This text helps students learn why, when, and how cost information is used to make effective decisions that lead a firm to success.

Cost Accounting provides comprehensive coverage of cost accounting principles and techniques in short learning segments that make it easier for students to learn and understand the material. In addition to a clear, concise writing style, carefully planned organization, and numerous illustrations, this new edition now offers an even more attractive design that enhances learning while maintaining student interest. A spreadsheet applications disk can be packaged with the text.
