This volume contains EU-related health legislation relevant to legal training programs on EU law and healthcare. Despite the availability of numerous handbooks, a collection of EU legislation on health has been missing. The book includes relevant treaty law provisions and secondary legislation (abridged) on health or health-related norms, clustered as: EU treaty law * human rights and health * public health * patient safety * consumer protection * patient mobility * mobility of health professionals * pharmaceuticals * medical devices * data protection * insurance * competition law.

This is a new edition of Rudden & Wyatt's popular and well-established statute book of EU law. It provides a clear and accessible collection of all of the key EU treaties and legislation that students need to study in detail and, with no additional author commentary, the collection is an ideal reference book in exams. With a readable and modern writing style, EU Law Directions clearly explains the key topics and developments in this fast-paced and influential subject area. No previous knowledge is assumed, making this the ideal text for those approaching EU law for the first time. With 30 years' experience teaching and examining EU law, Nigel Foster provides a student-friendly text which is readable without compromising on academic quality. The text is easy-to-follow with useful features throughout such as case summaries, key definitions and diagrams. Cross-references and end of chapter summaries demonstrate how topics link together and enable students to quickly build up a comprehensive understanding of EU Law. The text is clearly broken down into logical sections, guiding students through institutional, procedural and substantive law, with a new chapter on competition law added to the 4th edition. This text is also accompanied by a free Online Resource Centre

(www.oxfordtextbooks.co.uk/orc/foster_directions4e/) which includes the following features:

- An interactive timeline showing the key moments in EU legal history
- An interactive map illustrating the development of the EU and providing essential background knowledge
- Self-test questions with instant feedback
- Video clips from the European Commission
- Suggested approaches to end of chapter questions
- Study and exam tips
- Updates to the law
- Useful weblinks

Since its formation the European Union has expanded beyond all expectations, and this expansion seems set to continue as more countries seek accession and the scope of EU law expands, touching more and more aspects of its citizens' lives. The EU has never been stronger and yet it now appears to be reaching a crisis point, beset on all sides by conflict and challenges to its legitimacy. Nationalist sentiment is on the rise and the Eurozone crisis has had a deep and lasting impact. EU law, always controversial, continues to perplex, not least because it remains difficult to analyse. What is the EU? An international organization, or a federation? Should its legal concepts be measured against national standards, or another norm? The Oxford

Handbook of European Union Law illuminates the richness and complexity of the debates surrounding the law and policies of the EU. Comprising eight sections, it examines how we are to conceptualize EU law; the architecture of EU law; making and administering EU law; the economic constitution and the citizen; regulation of the market place; economic, monetary, and fiscal union; the Area of Freedom, Security, and Justice; and what lies beyond the regulatory state. Each chapter summarizes, analyses, and reflects on the state of play in a given area, and suggests how it is likely to develop in the foreseeable future. Written by an international team of leading commentators, this Oxford Handbook creates a vivid and provocative tapestry of the key issues shaping the laws of the European Union.

This series aims to produce original works which contain a critical analysis of the state of the law in particular areas of European Law and Set out different perspectives and suggestions for its future development. It also aims to encourage a range of work on law, legal institutions and legal phenomena in Europe, including 'law in context' approaches. The titles in the series will be of interest to academics; policymakers; policy formers who are interested in European legal, commercial and political affairs; practising lawyers including the judiciary; and advanced law students and researchers. Given the controversies and difficulties which preceded the coming into force of the Lisbon Treaty, it is easy to forget that the Treaty is a complex legal document in need of detailed analysis for its impact to be fully understood. Jean-Claude Piris, the Director-General of the Legal Service of the Council of the European Union (EU), provides such an analysis, looking at the historical and political contexts of the Treaty, its impact on the democratic framework of the EU and its provisions in relation to substantive law. Impartial legal analysis of the EU's functions, its powers and the treaties which govern it make this the seminal text on the most significant recent development in EU law. Since 1988, Jean-Claude Piris has served as the Legal Counsel of the Council of the EU and Director-General of its Legal Service. He is an Honorary Counsellor of State of France, a former diplomat at the UN and the former Director of Legal Affairs of the OECD. He was the Legal Advisor of the Successive Intergovernmental conferences which negotiated and adopted the treaties of Maastricht in 1992, Amsterdam in 1997 and Nice in 2001, the constitutional Treaty signed in Rome in 2004 and, finally, the Lisbon Treaty in 2007.

Asylum law in the European Union is ripe with caveats that allow for rejecting asylum applications due to 'protection' received in the home country or another location. Yet, when is 'protection' strong enough to make denying an application lawful?

A considered balance of depth, detail, context, and critique, Directions books offer the most student-friendly guide to the subject ; they empower students to evaluate the law, understand its practical application, and approach assessments with confidence.

The essays which appear in this work are based on the papers presented at a two-day conference held in Liverpool in July 2007 to celebrate the 50th anniversary of the signing of the Treaty of Rome establishing the EEC. The collection reflects critically upon some of the EU's historic characteristics and speculates imaginatively on some of the diverse challenges facing the Union in the future. Contributions from both established and emerging scholars of EU law and policy are united by two main themes: the paradox of the resilient yet unstable basis of the Union's constitutional fundamentals, and the ever-contested balance between the EU's core economic mission and its broader social values and aspirations. For any student, scholar or practitioner interested in the dynamic nature of the constitutional relationship between the Union and its Member States, and in the complex tensions underpinning the EU's substantive policies, these essays will be essential reading.

This book contains a collection of articles on different aspects of EU law written by one of Europe's most distinguished jurists during the past twenty years, some of which appear here for the first time in English. The book includes a Preface by Judge Koen Lenaerts, Vice-President of the European Court of Justice. The book is divided into five parts, covering EU constitutional law, the EU's judicial architecture, access to justice, European competition law and various other aspects of substantive EU law. In the field of EU constitutional law, the central text discusses the existence of implied material limits to the revision of the Treaties. The author argues that the powers of the Member States to amend the Treaties is limited by the existence of a hard core of principles of EU Treaty law, which cannot be revised without changing the 'constitutional' identity of the Union, leading to the conclusion that Member States can no longer be considered as the 'absolute masters of the Treaties'. Four articles relating to the EU's judicial system constitute the cornerstone of the collection. Drawing on his own experiences, the author examines the problems and challenges facing the setting up of a new EU court and explores different lines of reform of the EU judicial system.

Celebrating over 30 years as the market-leading series, Blackstone's Statutes have an unrivalled tradition of trust and quality. With a rock-solid reputation for accuracy, reliability, and authority, they remain first-choice for students and lecturers, providing a careful selection of all the up-to-date legislation needed for exams and course use.

The major Commentary on the Treaty on European Union (TEU) is a European project that aims to contribute to the development of ever closer conceptual and dogmatic standpoints with regard to the creation of a "Europeanised research on Union law". This publication in English contains detailed explanations, article by article, on all the provisions of the TEU as well as on several Protocols and Declarations, including the Protocols No 1, 2 and 30 and Declaration No 17, having steady regard to the application of Union law in the national legal orders and its interpretation by the Court of Justice of the EU. The authors of the Commentary are academics from ten European states and different legal fields, some from a constitutional law background, others experts in the field of international law and EU law professionals. This should lead to more unity in European law notwithstanding all the legitimate diversity. The different traditions of constitutional law are reflected and mentioned by name thus striving for a common framework for European constitutional law.

Infringement proceedings constitute a significant proportion of proceedings before the Court of Justice of the European Union and play a key role in the development of EU law. Their immediate purpose is to obtain a declaration that a Member State has, by its conduct, failed to

ful–l an obligation under the EU Treaties. The aim is to bring that conduct and its effects to an end and, ultimately, to eliminate infringements across the Union. This book – the –first comprehensive and detailed full-length work in English on infringement proceedings under Articles 258-260 TFEU – provides not only an in-depth discussion on the role and function of infringement proceedings within the EU legal order, but also a critical assessment of the procedures as they currently stand, complete with proposals for future changes. Recognizing that Member States' compliance with EU law is an integral part of the task of ensuring the rule of law throughout the Union, the author thoroughly explains the functioning of infringement proceedings, their requirements and related policies, including issues such as: – the Commission's discretion to bring a case before the Court; – the author of the infringement, including national courts or private entities; – Member States' procedural and substantive defences; – the different procedures under Articles 258, 259 and 260(2) and (3) TFEU; – rights of private parties; – interim measures; – –financial sanctions; – Member States' liability; and – the roles played by the European Parliament and the Ombudsman. Particular attention is devoted to rules that have not yet been fully interpreted, or where the current interpretation or application of the rules seems problematic. The book tackles, in particular, whether infringement proceedings, as they stand, constitute an appropriate means of ensuring observance by Member States' authorities of the EU acquis, and, if not, what reforms should be implemented in order to achieve this in the future. Such a detailed and in-depth examination of this fundamental procedure of EU law will be of great and long-lasting interest to EU and Member State administrators, legal practitioners and academics. Luca Prete is currently a référendaire (Legal Secretary) for Advocate General Wahl at the Court of Justice of the European Union, on secondment from the Legal Service of the European Commission. He is also a member of the Centre for European Law of the Free University of Brussels (VUB). He has published several articles in the fi–eld of EU law and is a regular speaker at EU law seminars and conferences.

Since its inception, the European Union (EU) has revised its foundational treaties several times, resulting in national ratification processes involving different actors, with varying success. This book focuses on the politics of ratification of EU Treaties and reviews the processes of ratification of EU primary legislation. Existing research and academic debate on EU constitutional politics have almost exclusively focussed on negotiation of new treaties and their institutional setting. However, this book explains how the result of ratification was achieved, and analyses the strategy that actors pursue across Europe. Ratification of the Treaty of Maastricht and the EU Constitution failed totally, whilst other ratification can be considered partial failures such as the Irish Nice and Lisbon referendums. As the EU Constitution has proved, the ratification process may have deep effects unforeseen during the processes of negotiation. In recent years, ratification has produced some of the most intense debates on national membership of the EU and the EU itself. The Politics of Ratification of EU Treaties will be of interest to students and researchers of European Studies, European Union studies, European Union Law and European Union Politics.

Investigates the struggle between governments, parliaments, the people and courts over who participates in EU treaty making.

This Commentary provides an article-by-article summary of the TEU, the TFEU, and the Charter of Fundamental Rights, offering a quick reference to the provisions of the Treaties and how they are interpreted and applied in practice. Written by a team of contributors drawn from the Legal Service of the European Commission and academia, the Commentary offers expert

guidance to practitioners and academics seeking fast access to the Treaties and current practice. The Commentary follows a set structure, offering a short overview of the Article, the Article text itself, a key references list including essential case law and legislation, and a structured commentary on the Article itself. The editors and contributors combine experience in practice with a strong academic background and have published widely on a variety of EU law subjects.

This book offers a legal understanding regarding the core elements of SGEI (Services of General Interest), and of how the post-Lisbon constitutional framework on SGEI affects the application of the EU market rules by the EU Court of Justice, including procurement rules, to public services. It is built up of three parts, namely Part I: No Exit from EU Market Law for Public Services, Part II: SGEI as a Constitutional Voice for Public Services in EU Law, and Part III: The cost of loyalty, the relationship between EU procurement and state aid legislation on social services and the Treaty rules on SGEI, ending with a case study of Swedish systems of choice. Analyses are also provided on how the EU legislator engages in the Europeanisation of social services through EU procurement and state aid rules that have an ambiguous relationship to the Treaty framework on SGEI. Some explanation to this ambiguity is proposed by studying how the application of EU state aid rules could hinder the development of Swedish systems of choice liberalizing publicly-funded elderly care and school education. Included are propositions on crucial but yet unsettled legal questions, in particular what the legal meaning and relevance of the notion of economic activity in EU market law are and which core elements characterize SGEI. This book is therefore mainly aimed at legal academics and practitioners but may also be of interest to political scientists. Caroline Wehlander studied at Umeå University and holds the title of Doctor of Laws. She lives and works in Sweden.

Nigel Foster provides a concise and clear explanation of EU law, covering both institutional aspects and key substantive areas, offering an accessible entry point to the subject.

This book re-examines the law governing the obligations of the Member States in the European Union from the perspective of the interests formulated and pursued by national governments in the EU. Member States' interests provide the source as well as the limitations of the obligations undertaken by the Member States in the Union. From the early days of European integration, they have determined how the law frames and defines EU obligations in the Treaties, in legislation and in the jurisprudence of the EU Court of Justice. The book neither challenges directly, nor undermines the current state of the law in the EU. Instead, it introduces a framework for interpreting and analysing legal developments – both legislative and jurisprudential – from an angle which brings the legal dimension of the membership of States in the European Union closer to its political reality. By choosing Member State interest to frame its analysis of the law, the book expresses a clear intention to explore further the interactions and the potential interconnectedness of the intergovernmentalism of EU decision-making and the normative supranationalism of the application and the enforcement of Member State obligations, in particular at the national level. Analysing how diversity among the Member States, which arises from different local interests, institutional frameworks and socio-economic arrangements, is assessed and sustained in EU legislation and in the jurisprudence of the Court of Justice, the book examines the impact of EU obligations on Member State territorial authority and territoriality.

Providing a new perspective on Member State interests and European Law, the book closes the widening gap between the politics and law of European integration and between its political science and legal analysis. The book is essential reading for students and scholars in the field of state law, EU law and politics.

This collection of essential EU primary and secondary law effectively guides students to the material they need during exams.
