In this book, popular Fuji Rumors "X-Pert Corner" columnist Rico Pfister teaches you about the little-known capabilities of the Fujifilm X-T4, which he's discovered through months of in-depth research and experimentation with the camera. After a brief overview of the camera's basic functions, Rico cuts to the chase and provides a plethora of tips and practical instructions not found in the user's manual. With this knowledge, you will be able to take full advantage of the capabilities of the X-T4. The Fujifilm X-series cameras have amazing features but may require an adjustment period for those new to using these cameras, even photographers who have been lifetime shooters. This guide will help you to quickly feel comfortable using your camera so that you can achieve excellent results. Topics covered include: -Menu shortcuts -Long exposures -Firmware upgrades -Hybrid autofocus system -Auto and manual focusing -Face detection -ISOless sensor -Dynamic Range expansion -Film simulations -Custom settings -RAW conversion -Movies -Self-timer -Flash -Adapted lenses -Taking Videos -And much more...

'Don't give up. Don't let them kill your spirit. Things will change. You need to be strong. You need to be ready. And you will need courage.' Juno is young; she has no authority, no power, and to question the ways of Taris is discouraged. She knows what it's like when the community withdraws from her - turning their backs and not speaking to her until she complies. The Taris Project was the brainchild of a desperate twenty-first-century world, a community designed to survive even if the rest of humanity perished. An isolated, storm-buffed island in the Southern Ocean was given a protective dome and its own balmy climate. And now Juno is one of 500 people who live there - but what has happened to the outside world in the years since Taris was established? The island has not been in contact with Outside since the early years of its existence. Juno yearns to know about life Outside, just as she yearns to be allowed to grow her hair. It is a rule on Taris that all must have their heads shaved bare. But is it a rule that could be broken? Danger awaits any who suggest it.

Over the past 40 years, Lois Greenfield has earned a reputation as one of the world's most accomplished and respected photographers of human motion. Her images of dancers in mid-flight or mid-movement are astonishingly beautiful and capture the magic of dance in a unique way. In the 17 years since her last book was published, Greenfield has moved into digital colour photography, and some 150 of these breathtaking images are reproduced in *Moving Still*. They reflect her collaboration with leading contemporary dancers, many of whom perform with international touring companies. The book reunites Greenfield with the distinguished writer and curator William A. Ewing, her enduring champion across the decades and author of her two previous monographs, who provides an illuminating introduction as well as an interview with the photographer about her recent work. The extended captions by Greenfield provide fascinating insights into the creative process. Divided into four picture sections, the free-flowing, rhythmic design of the book does justice to the majestic beauty of Greenfield's photographs.

"Behind Photographs began as the personal quest of photographer Tim Mantoani to document and preserve noted photographers together with their images. "We have come to a point in history where we are losing both photographic recording mediumsphotographic recording mediums and iconic photographers," Mantoani comments. "While many people are familiar with iconic photographs, the general public has no idea of who created them. This book became a means to do that, the photographer and their photograph in one image."--Publisher's website, <https://www.channelphotographics.com/behindphotographs.php>, viewed February 6, 2012.

An elegant homage to the many deserted buildings along the Hudson River--and a plea for their preservation.

Shrikes are a charismatic group of birds occurring throughout most of the Old World and North America. The family Laniidae consists of 31 species in three genera, if the Southern Grey Shrike and Great Grey Shrike are accepted as separate species which the author recommends. This book is the first to cover all the shrikes in one volume. Shrikes because of their habit of impaling their prey on the thorns of bushes, were known in the countryside as 'butcher-birds' and, indeed, their Latin name *lanius* means butcher. They are small to medium-sized birds. The smallest, Emin's Shrike which occurs in central Africa, is about the size of a House Finch or Greenfinch, and the largest is the Chinese Grey Shrike. One of their most striking features is their raptor-like hooked bill. Another typical feature is their face mask which gives them the look of small, fierce highwaymen. Many species are of conservation concern including the Great Grey Shrike, The Lesser Grey Shrike, The Woodchat Shrike and the Red-backed Shrike in Europe and the Loggerhead Shrike in North America. The decline of these species has been largely caused by changing farming methods, but all are now legally protected. This brilliant book brings together the most recent information on the shrike family and the superb text and illustrations should lead to successful and safe identification of all species in the field.

How far should you go to make a profit? Infoquake, the debut novel by David Louis Edelman, takes speculative fiction into alien territory: the corporate boardroom of the far future. It's a stunning trip through the trenches of a technological war fought with product demos, press releases, and sales pitches. Natch is a master of bio/logics, the programming of the human body. He's clawed and scraped his way to the top of the bio/logics market using little more than his wits. Now his sudden notoriety has brought him to the attention of Margaret Surina, the owner of a mysterious new technology called MultiReal. Only by enlisting Natch's devious mind can Margaret keep MultiReal out of the hands of High Executive Len Borda and his ruthless armies. To fend off the intricate net of enemies closing in around him, Natch and his apprentices must accomplish the impossible. They must understand this strange new technology, run through the product development cycle, and prepare MultiReal for release to the public—all in three days. Meanwhile, hanging over everything is the specter of the infoquake, a lethal burst of energy that's disrupting the bio/logic networks and threatening to send the world crashing back into the Dark Ages. With Infoquake, David Louis Edelman has created a fully detailed world that's both as imaginative as Dune and as real as today's Wall Street Journal.

From New York Times Bestseller Mimi Jean Pamfiloff comes SMART TASS, a new Romantic Comedy. He's the hot college quarterback all the girls want. She's the smart girl he loves to pick on. And now that they're all grown up, things are about to get geekin' ugly. My name is Tass. I'm smart, I'm driven, and I am determined not to let prankster Hunter Johnson continue raining on my parade. When we were little, he'd pull my hair and call me names. When we were teenagers, he'd throw food and tease me for being a flat-chested virgin. But now that we've ended up at the same college, he's out of his hot head if he thinks he can keep messing with my life. It's like he's fixated on me or something. Well, guess what, Mr. Amazefootball? I'm not that geeky little girl anymore and you do not screw with a smart woman. So what's my plan? It's definitely wild, and he's about to find out.
