This work challenges the field of British cultural studies to return to the question of social class as a primary focus of study. The chapters examine contemporary working-class life and its depiction in the media through a number of case studies on topics such as popular cinema, football, romance magazines and club culture. The essays pose methodologies for understanding working-class responses to dominant culture, and explore the contradictions and limitations of the traditional Marxist model. The book's contributors conclude that it is time for cultural theorists to revisit issues of working-class cultural formations and to renew the original radical intentions of the discipline by reintegrating class analysis into social templates of race, sexuality and gender.

The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.

What about plants? Don't animals eat other animals? There are no perfect vegans, so why bother? If you're vegan, how many times have you been asked these, and other similarly challenging, questions from non-vegans? Using humor and reason, Sherry F. Colb takes these questions at face value and also delves deeply into the motivations behind them, coming up with answers that are not only intelligent but insightful about human nature. Through examples, case studies, and clear-eyed logic, she provides arguments for everything from why veganism is compatible with the world's major religions to why vegetarianism is not enough. In the end, she shows how it is possible for vegans and non-vegans to engage in a mutually beneficial conversation without descending into counterproductive name-calling, and to work together to create a more hospitable world for human animals and non-human animals alike. "A rare fusion of passion and logic, idealism and pragmatism, style and substance, and--in its measured confrontation of the most challenging questions vegans face--a revolutionary guide for advocates seeking to engage the ethics of eating animals through authentic dialogue rather than bombastic rhetoric. Colb's literary touch is something to behold. She writes in a way that will appeal to non-vegans and vegans alike, building bridges across an all too turbulent divide. This is food writing at its best and food writing as it should be: honest, inclusive, inspirational, and, more than you might imagine, timely."--James McWilliams, Professor of History, Texas State University, San Marcos, and author of *Just Food* and *The Politics of the Pasture* "With compassion, humor, and eloquence, Sherry Colb provides a clear and engaging account of what motivates vegans to eat and live the way we do. A must-read for anyone who has ever wondered (or been asked) 'Why do vegans think it is okay to kill plants but not animals?' or 'Why avoid dairy and eggs?'"--Rory Freedman, New York Times bestselling co-author of *Skinny*

Bitch and author of Beg "Sherry Colb provides thoughtful, articulate, intelligent answers to the commonly asked questions faced by every vegan. Intertwining information, reason, and her own personal experience, Colb offers an invaluable aid both for those answering the questions and for those posing them. The perfect companion "--Colleen Patrick-Goudreau, bestselling author and creator of The 30-Day Vegan Challenge "A powerful, compelling, and thoroughly engaging defense of veganism from an absolutely terrific legal scholar."--Gary L. Francione, Board of Governors Professor of Law and Katzenbach Distinguished Scholar of Law and Philosophy, Rutgers University, author of Introduction to Animal Rights: Your Child or the Dog? "With crystal clear logic and an empathic voice, Sherry Colb has written a must-read source for anyone curious, skeptical, or downright antagonistic towards vegan living. This book is destined to be a classic of the emerging vegan oeuvre."--Jonathan Balcombe, Ph.D., author of The Exultant Ark "Full of thoughtful analyses of some of the most common, perplexing, and often challenging reactions to vegans and veganism. Any vegan or vegetarian who has wished they'd had a more informed response to a question or challenge about their ideology--and anyone who wants to better understand some of the fundamental concepts of veganism--will benefit from reading Sherry Colb's in-depth exploration of the issues."--Melanie Joy, Ph.D., author of Why We Love Dogs, Eat Pigs, and Wear Cows

The heartwarming true story of a woman and the horse who changed her life. Jana Harris had always dreamed of having a horse farm, and she knew the horse on whom she could build her dreams the moment she saw her on a ranch in the Eastern Mountains of Washington State, where a herd had been corralled to be sold: a beautiful, deep dark red-colored mare standing about sixteen hands, with a white star on her pretty head. Something about the way this mare guarded her handsome foal spoke to Harris. The mare was named True Colors. When True Colors was delivered to Harris's ranch three months later, however, she was unrecognizable: head-shy from the infected sores on her face, and lungs damaged by pneumonia, she sensed demons hiding in everything from the scent of fabric softener on clothes to a gate in a fence. This injured, traumatized horse existed between two worlds—wild and domesticated—and belonged to neither. Remarkably, the other horses fell in love with her on sight. And true to her name, True Colors would never pretend to be something she was not; with her wise, intuitive nature, she would end up changing the lives of everyone she encountered. This is the story of True Colors and how, with her quiet wisdom, she became the heart of the range and farm. There is a famous horseman's saying: A horse never lies about its pain. But maybe we should also consider: A horse never lies about love.

Horse Owner's Guide to Toxic Plants is a must-have, exclusive reference book for all horse owners, and the first of its kind on the subject of equines and plants. Keep this book in the medicine cabinet in the barn. Walk around the pastures with the book in hand, especially in late spring or early summer. Or pack it with on a trail ride. It just might save your horse's life. Horse Owner's Guide to Toxic Plants is organized according to types of plants—trees, bushes, shrubs, and vines, ferns and plants, weeds and wildflowers, and grasses and horsetails. Since visuals are very important for correct identification, clear color photographs are shown, including wherever possible a close-up photograph and line drawing to better identify each plant. Horsewoman Sandra McQuinn has researched and compiled information on more than 100 more common but toxic plants that grow in backyards, pastures, and on the range and trail. Also included is advice from a veterinarian on how to recognize the symptoms of poisonings in your horse and what steps you or your own veterinarian should take if you suspect your horse has eaten a toxic plant. Brimming with pertinent information and expert advice, Horse Owner's Guide to Toxic Plants is a must-have for all equine aficionados. No horse owner should be without it, including those who board their horses.

The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of

Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ? an explanation of the key aspects of the CEFR for teaching and learning; ? a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ? a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ? promote and support the learning and teaching of modern languages; ? enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ? protect linguistic and cultural diversity in Europe; and ? promote the right to quality education for all.

The Teacher's Book is accompanied by a DVD-ROM with tests in both PDF and editable Word format, along with a series of teacher training videos. There is also additional photocopiable material in the Teacher's Book, with a focus on material for the Speaking test.

Through performance and the spoken word, Yucatec Maya storytellers have maintained the vitality of their literary traditions for more than five hundred years. *Telling and Being Told* presents the figure of the storyteller as a symbol of indigenous cultural control in contemporary Yucatec Maya literatures. Analyzing the storyteller as the embodiment of indigenous knowledge in written and oral texts, this book highlights how Yucatec Maya literatures play a vital role in imaginings of Maya culture and its relationships with Mexican and global cultures. Through performance, storytellers place the past in dynamic relationship with the present, each continually evolving as it is reevaluated and reinterpreted. Yet non-indigenous actors often manipulate the storyteller in their firsthand accounts of the indigenous world. Moreover, by limiting the field of literary study to written texts, Worley argues, critics frequently ignore an important component of Latin America's history of conquest and colonization: The fact that Europeans consciously set out to destroy indigenous writing systems, making orality a key means of indigenous resistance and cultural continuity. Given these historical factors, outsiders must approach Yucatec Maya and other indigenous literatures on their own terms rather than applying Western models. Although oral literature has been excluded from many literary studies, Worley persuasively demonstrates that it must be included in contemporary analyses of indigenous literatures as oral texts form a key component of contemporary indigenous literatures, and storytellers and storytelling remain vibrant cultural forces in both Yucatec communities and contemporary Yucatec writing.

Experience firsthand the inspiring and heartwarming bonds between wounded veterans and their service and companion animals. *Vets and Pets* tells fifteen emotional and entertaining stories of the incredible bonds between wounded warriors, veterans, and other service members and their service and companion animals. Whether these special relationships are with dogs, cats, horses, pigs, or even birds of prey, readers will discover how these remarkable animals help veterans return to civilian life and live independently while simultaneously bringing joy and confidence into their lives. Tyler struggled to adjust to civilian life after losing both of his legs in Afghanistan, until he met his intelligent and willfully disobedient red European Doberman pinscher, Apollo. Vietnam veteran Patrick regained a sense of well-being and hope through the study of birds of prey. Max the horse has helped numerous veterans learn to trust, improve their communication, and increase their self-confidence and self-esteem. Mandi discovered that the intelligence and unconditional love of pigs were exactly what she needed to heal from an abusive past and a disappointing army-training injury. These are just a few of the uplifting stories that are featured in this striking collection. In addition to exploring the unique, lifelong bonds that can develop between veterans and their animal companions, *Vets and Pets* spotlights extraordinary nonprofits that unite wounded warriors

with service and companion animals, including Pets for Patriots, Hooves Marching for Mercy, Horses Helping Heroes, and Avian Veteran Alliance, among others. A portion of the proceeds from this book will be donated to Pets for Patriots.

Do horses make choices? How do they seem to know what people are thinking and feeling? Are horses spiritual beings with a destiny all their own? If so, how is this destiny connected with humanity's future? How does the equine mind compare with the human mind? What do horses have to teach people? And why are women so attracted to horses? These are some of the questions writer and equine therapist Linda Kohanov explores in her extraordinary book *The Tao of Equus*. In it she intertwines the story of the spiritual awakening she experienced with her black mare Rasa with compelling neurological research, cultural history, mythology, and first-hand anecdotes from years of teaching and facilitating equine therapy. She delves into the mental and spiritual processes behind the magical connections people, and women in particular, often experience with horses. She skillfully describes the subtle behavioral nuances horses express and perceive — what she calls the "wisdom of the prey" — as well as a feminine wisdom found in her powerful interactions with horses, bringing to the page subtleties that women riders have intuited for centuries. Blending her extraordinary experience — what some would consider paranormal — with a wide-ranging survey of the phenomena of horse-human communication, Kohanov delivers a ground-breaking work sure to interest both longtime riders and readers interested in the leading edge of animal perception and animal-human communication.
