Catalyst Deactivation 1994 was an expansion of earlier, highly successful symposia. The objective of the symposium was to promote a scientific approach of the phenomenon of catalyst deactivation which will contribute to the development of catalysts which are less subject to structural transformations and more resistant to poisons and coke formation. These aspects are dealt with in 12 plenary lectures, 48 oral presentations and 35 poster papers, which were critically selected from an impressive response from some 30 countries. Both fundamental and applied aspects were covered. The deactivation of catalysts in important industrial processes like fluid bed catalytic cracking hydrotreatment, hydrodesulfurization, catalytic reforming, hydrodenitrogenation, steam reforming, hydrodemetallization, hydrocracking, Fischer-Tropsch synthesis, propane dehydrogenation, phthalic anhydride synthesis received considerable attention. Mechanisms of poisoning, sintering and coking were further investigated and modelled and new experimental techniques for the characterization and the quantification of deactivation were also introduced.

FOR DISTRIBUTION OUTSIDE THE USA. In *The Land Between*, author Jeff Manion uses the biblical story of the Israelite's journey through Sinai desert as a metaphor for being in undesired, transitional space. After enduring generations of slavery in Egypt, the descendants of Jacob travel through the desert (the land between) toward their new home in Canaan. They crave the food of their former home in Egypt and despise their present environment. They are unable to go back and incapable of moving forward. *The Land Between* explores the way in which their reactions can provide insight and guidance on how to respond to God during our own seasons of difficult transition. The book provides fresh biblical insight for people traveling through undesired transitions (e.g. foreclosure, unemployment, parents in declining health, post-graduate uncertainty, business failure, etc.) who are looking for hope, guidance, and encouragement. While it

is possible to move through transitions and learn little, they provide our greatest opportunity for spiritual growth. God desires to meet us in our chaos and emotional upheaval, and he intends for us to encounter his goodness and provision during these upsetting seasons.

The application of these concepts is illustrated by a variety of experiments and demonstration systems. The diversity of the demonstration systems reinforces the value of the analytic methods.
