A landmark new history from design journalist Nick Hull, *Land Rover Design – 70 years of Success* offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR's design resource. From the early days of chalk drawings and wooden models to today's digital renderings and milled clays for the latest Range Rover Evoque, Land Rover's designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

4-cylinder. Does NOT cover 2.5 litre V6 engine. Turbo-Diesel: 2.0 litre (1951cc) TD4. Working in the Wild: Land Rover's Manual for Africa is designed to equip Land Rover users with the practical know-how it takes to make the most of the vehicle's capacity for hard work in hostile conditions. The aim of the authors has been to produce a no-nonsense guide which can be used by virtually anyone to keep a Land Rover running to maximum efficiency and effect almost anywhere on Earth. It is based upon the in-depth operating experience of Land Rover engineers and users throughout the world over many years. The book looks at every stage of the working life of a Land Rover - the selection and purchasing of the right kind of Land Rover - how to drive it to maximum effect - how to look after it away from conventional workshops - how to avoid problems - how to overcome unavoidable difficulties - and much more. It has been welcomed by international agencies and specialists who themselves have faced the conditions and situations for which it offers advice.

It's not just smaller, lesser-known companies that have launched dud brands. On the contrary, most of the world's global giants have launched new products that have flopped - spectacularly and at great cost. Haig organizes these 100 ""failures"" into ten types which include classic failures (e.g., New Coke), idea failures (e.g., R.J.Reynolds' smokeless cigarettes), extension

To celebrate the 50th anniversary of the NSRI, here is a collection of daring rescues filled with drama and danger. From burning ships to shark attacks, sinking trawlers to hallucinating fishermen, these are the stories of man's constant battle with some of the most dangerous waters on earth. But there is one story in particular that gave rise to the creation of the NSRI... On 12 April 1966, four fishing boats put out to sea from Stilbaai on South Africa's southern coast. Soon they were all pulling in fish as fast as they could bait their hooks, and the boats were settling lower in the water. Shortly before sunset, skipper Gerhard Dreyer saw clouds building on the horizon. But the fishing was too good and they ignored the signs. Later that night a gale force wind slammed into them. 'I told the men to throw everything overboard,' Gerhard remembers. An hour before midnight, Gerhard headed for deeper water to try and ride out the swells. As dawn broke, they saw for the first time the true extent of the night's damage: among the flotsam, one man in a lifebuoy. That man was the only crewman from the other three boats to survive the terrible storm. Seventeen men died that night. Simonstown schoolteacher Patti Price was horrified when she read the news. She began a media campaign and appealed to the president of the Society of Master Mariners. As a direct result of her efforts, the South African Inshore Rescue Service was founded in August 1966 (renamed the National Sea Rescue Institute in 1967).

Today, the NSRI has 35 rescue bases and over 1 000 volunteers.
