Insisting that politics and ideology must remain at the forefront of any examination of nineteenth-century America, Foner reasserts the centrality of the Civil War to the people of that period. The first section of this book deals with the causes of the sectional conflict; the second, with the antislavery movement; and a final group of essays treats land and labor after the war. Taken together, Foner's essays work towards reintegrating the social, political, and intellectual history of the nineteenth century.

In this groundbreaking new account of their marriage, Rowley describes the remarkable courage and lack of convention--private and public--that kept Franklin and Eleanor Roosevelt together.

From the Preface: The title for this collection was the title of a course in literary criticism that I gave for many years at Bennington College. And much of the material presented here was used in that course. The title should serve well to convey the gist of these various pieces. For all of them are explicitly concerned with the attempt to define and track down the implications of the term "symbolic action," and to show how the marvels of literature and language look when considered from that point of view.

the YA audience with photos and journal entries! A movement that started with a hashtag--#BlackLivesMatter--on Twitter spread across the nation and then across the world. From one of the co-founders of the Black Lives Matter movement comes a poetic memoir and reflection on humanity. Necessary and timely, Patrisse Khan-Cullors' story asks us to remember that protest in the interest of the most vulnerable comes from love. Leaders of the Black Lives Matter movement have been called terrorists, a threat to America. But in truth, they are loving women whose life experiences have led them to seek justice for those victimized by the powerful. In this meaningful, empowering account of survival, strength, and resilience, Cullors and asha bandele seek to change the culture that declares innocent black life expendable.

Collects six short novels from one of the most influential authors of the twentieth century.

The period 1350–1750 saw major developments in European warfare, which not only had a huge impact on the way wars were fought, but also are critical to long-standing controversies about state development, the global ascendancy of the West, and the nature of 'military revolutions' past and present. However, the military history of this period is usually written from either medieval or early-modern, and either Western or Eastern European, perspectives. These chronological and geographical limits have produced substantial confusion about how the conduct of war changed. The essays in this book provide a comprehensive overview of land and sea warfare across Europe throughout this period of momentous political, religious, technological, intellectual and military change. Written by leading experts in their fields, they not only summarise existing scholarship, but also present new findings and new ideas, casting new light on the art of war, the rise of the state, and European expansion.

The hauntingly prophetic classic novel set in a not-too-distant future where books are burned by a special task force of firemen.

'Another indispensable classic' The Times "Ray Bradbury's gift for storytelling reshaped our culture and expanded our world"

Barack Obama Guy Montag is a fireman. His job is to burn books, which are forbidden, being the source of all discord and unhappiness. Even so, Montag is unhappy; there is discord in his marriage. Are books hidden in his house? The Mechanical Hound of the Fire Department, armed with a lethal hypodermic, escorted by helicopters, is ready to track down those dissidents who defy society to preserve and read books. The classic dystopian novel of a post-literate future, Fahrenheit 451 stands alongside Orwell's 1984 and Huxley's Brave New World as a prophetic account of Western civilization's enslavement by the media, drugs and conformity. Bradbury's powerful and poetic prose combines with uncanny insight into the potential of technology to create a novel which, decades on from first publication, still has the power to dazzle and shock.

The New York Times bestselling account of one of history's most brutal -- and forgotten -- massacres, when the Japanese army destroyed China's capital city on the eve of World War II In December 1937, one of the most horrific atrocities in the long annals of wartime barbarity occurred. The Japanese army swept into the ancient city of Nanking (what was then the capital of China), and within weeks, more than 300,000 Chinese civilians and soldiers were systematically raped, tortured, and murdered. In this seminal work, Iris Chang, whose own grandparents barely escaped the massacre, tells this history from three perspectives: that of the Japanese soldiers, that of the Chinese, and that of a group of Westerners who refused to abandon the city and created a safety zone, which saved almost 300,000 Chinese. Drawing on extensive interviews with survivors and documents brought to light for the first time, Iris Chang's classic book is the definitive history of this horrifying episode. "Chang vividly, methodically, records what happened, piecing together the abundant eyewitness reports into an undeniable tapestry of horror." - Adam Hochschild, Salon !--[if !supportAnnotations]-- !--[if !supportAnnotations]-- !--[endif]--

Points of Departure encourages a return to empirical research about writing, presenting a wealth of transparent, reproducible studies of student sources. The volume shows how to develop methods for coding and characterizing student texts, their choice of source material, and the resources used to teach information literacy. In so doing, the volume advances our understanding of how students actually write. The contributors offer methodologies, techniques, and suggestions for research that move beyond decontextualized guides to grapple with the messiness of research-in-process, as well as design, development, and expansion. Serviss and Jamieson's model of RAD writing studies research is transcontextual and based on hybridized or mixed methods. Among these methods are citation context analysis, research-aloud protocols, textual and genre analysis, surveys, interviews, and focus groups, with an emphasis on

process and knowledge as contingent. Chapters report on research projects at different stages and across institution types—from pilot to multi-site, from community college to research university—focusing on the methods and artifacts employed. A rich mosaic of research about research, *Points of Departure* advances knowledge about student writing and serves as a guide for both new and experienced researchers in writing studies. Contributors: Crystal Benedicks, Katt Blackwell-Starnes, Lee-Ann Kastman Breuch, Kristi Murray Costello, Anne Diekema, Rebecca Moore Howard, Sandra Jamieson, Elizabeth Kleinfeld, Brian N. Larson, Karen J. Lunsford, M. Whitney Olsen, Tricia Serviss, Janice R. Walker

As new media mature, the changes they bring to writing in college are many and suggest implications not only for the tools of writing, but also for the contexts, personae, and conventions of writing. An especially visible change has been the increase of visual elements—from typographic flexibility to the easy use and manipulation of color and images. Another would be in the scenes of writing—web sites, presentation "slides," email, online conferencing and coursework, even help files, all reflect non-traditional venues that new media have brought to writing. By one logic, we must reconsider traditional views even of what counts as writing; a database, for example, could be a new form of written work. The authors of *Writing New Media* bring these ideas and the changes they imply for writing instruction to the audience of rhetoric/composition scholars. Their aim is to expand the college writing teacher's understanding of new media and to help teachers prepare students to write effectively with new media beyond the classroom. Each chapter in the volume includes a lengthy discussion of rhetorical and technological background, and then follows with classroom-tested assignments from the authors' own teaching.

When we tell someone that our child is autistic, the most common response is a sad face and an apologetic look. I hate it when people say "I'm sorry to hear that". Parenting a child on the autistic spectrum can be tough at the best of times, but few books take the time to celebrate the love and laughter an autistic child can elicit in their parents and those around them. In this warm, honest and laugh-out-loud tale of bringing up Bobby, now ten, Georgina Derbyshire shares and rejoices in his 'slightly different' childhood. As she outlines momentous events in Bobby's life, from the day he decided he was a dog (continuing life as a canine for a year afterwards), to the time he catapulted an innocent shopper into a mountain of strawberries, Georgina repeatedly challenges the perception of autism as an affliction, maintaining that neurotypical people often make far less sense. Through her light-hearted and hilarious storytelling, she reveals how social codes and psychological games make the neurotypical world a very confusing place to live in, more so than ever if you happen to be a young boy with a passion for rocks, tape measures and trains. This book is a must for anybody involved in the upbringing of an autistic child, whether they are in search of a little comfort, companionship, light relief - or all three.
