What is the proper way to ask Mr. Panda for doughnuts? This invaluable guide will prove to you that the biggest secret to a successful homeschool is motivation. Because when you choose how to homeschool, there is an elephant in the room. And that's you. You are the parent. But now you are the teacher too. That is potentially an enormous problem on the motivation front. Picture this: What happens when you end up in lots of battles with the kids? The kids aren't interested. They don't want to learn. You are tearing your hair out. This is their future ...Can't they realize that? What if they don't get any exams or qualifications? They will have failed. And you will have failed too. This guide shows you exactly what things you can do in your homeschool to get your kids happy and enthusiastic - and what not to do. Dealing with common homeschool problems like this plea: "Desperate for enlightenment. My kid refuses to do any work" , the book contains indispensable homeschooling help for all homeschoolers, old and new alike. And, since giving your child the best start in life is something we all have in common, you will find the advice here applies worldwide whether you call it homeschooling or, as in the UK, home education. Based on unique experience from one of the few second generation homeschool families and suggestions from more than 8,500 Facebook fans, Secrets of Success will show you: What makes a good homeschool teacher Practical steps to keep your kids motivated and in love with learning How to make a homeschool schedule

which works for all of you How to deal with the potential nightmare of homeschooling high school and the responsibility of motivating kids through exams At all times practical, this upbeat guide is essential reading whatever homeschooling method you follow. Whether you stick to a strict schedule with clear academic targets, decide on relaxed homeschooling, or let your child lead the way and unschool, this guide will teach you the essential steps to success using real-life insights from homeschoolers who have 'been there and done that.' With a homeschool son now going to Oxford University and a daughter following an unschooling route as a talented artist, the author argues that most parents misunderstand what makes young people motivated. This problem becomes particularly acute when it comes to homeschooling high school and the responsibility for getting your children through exams. Getting your unmotivated teen on-side is something all parents struggle with. Learning to trust your child and accept what they say - even though you may not agree with it - is one of the homeschooling lessons which is hardest to put into practice. Uncovering the five common motivational mistakes made by parents, the book concludes by proving that the academic route is not the only path to homeschooling success. Drawing on inspiration from leading educationalists like John Holt, Ken Robinson, Charlotte Mason and Maria Montessori, you will find a wealth of practical help so that you can make homeschooling the best and most fulfilling thing you've ever done. "It is time to think outside the box and teach your child to embrace a life of learning. This book

will give you the tools to do that." Lisa Vaught "Great book, very encouraging and supportive." Janet Kitzinger, a social anthropologist, explores the experience of grandmotherhood both personally and historically based on detailed research.

Another laugh-out-loud book from the author of *The Paper Bag Princess!* "Hey you dumb pigs!" When Megan lets all of the pigs out of the pen, they start to take over, and show her that they may not be so dumb after all. A newly designed Classic Munsch picture book introduces this tale of underestimated livestock to a new generation of young readers.

When Nicki drops his white mitten in the snow, he goes on without realizing that it is missing. One by one, woodland animals find it and crawl in; first, a curious mole, then a rabbit, a badger and others, each one larger than the last. Finally, a big brown bear is followed in by a tiny brown mouse and what happens next makes for a wonderfully funny climax. As the story of the animals in the mitten unfolds, the reader can see Nicki in the borders of each page, walking through the woods unaware of what is going on. In this oversized board book edition, Jan Brett has once again creates a dramatic and beautiful book in her distinctive style. She brings the animals to life with warmth and humor, and her illustrations are full of visual delights and details faithful to the Ukrainian tradition from which the story comes.

In the tradition of *Silent Spring* and *The Sixth Extinction*, an urgent, meticulously researched, and groundbreaking book about the ways in which chemicals in the modern environment are changing—and endangering—human sexuality and fertility on the grandest scale, from renowned epidemiologist Shanna Swan. In 2017, author Shanna Swan and her team of researchers completed a major study. They found that over the past four decades, sperm levels among men in Western countries have dropped by more than 50 percent. They came to this conclusion after examining 185 studies involving close to 45,000 healthy men. The result sent shockwaves around the globe—but the story didn't end there. It turns out our sexual development is changing in broader ways, for both men and women and even other species, and that the modern world is on pace to become an infertile one. How and why could this happen? What is hijacking our fertility and our health? *Count Down* unpacks these questions, revealing what Swan and other researchers have learned about how both lifestyle and chemical exposures are affecting our fertility, sexual development—potentially including the

increase in gender fluidity—and general health as a species. Engagingly explaining the science and repercussions of these worldwide threats and providing simple and practical guidelines for effectively avoiding chemical goods (from water bottles to shaving cream) both as individuals and societies, *Count Down* is at once an urgent wake-up call, an illuminating read, and a vital tool for the protection of our future.
