What do you do when your life feels as busy as a three-ring circus? Juggling Elephants tells a simple but profound story about one man with a universal problem. Mark has too much to do, too many priorities, too much stress, and too little time. As he struggles to balance his many responsibilities without cracking under the pressure, Mark takes a break to attend the circus with his family. There he has a surprising conversation with a wise ringmaster. He leaves with a simple but powerful lesson: Trying to get everything done is like juggling elephants -- impossible. So Mark begins to think about his work, family, and personal life the way a ringmaster thinks about the many acts in a three-ring circus. He discovers that managing his various acts can be fun and easy once he changes his attitude and follows his new friend's ongoing guidance. Mark soon realizes:

- If you keep trying to juggle elephants, no one, including you, will be thrilled with your performance.
- A ringmaster cannot be in all three rings at once.
- The key to the success of a circus is having quality acts in all three rings.
- Intermission is an essential part of any good circus.

Juggling Elephants is a wonderfully lighthearted guide for everyone who feels like they're about to be squashed. It will help you better focus your time and energy, so you'll be able to enjoy more of the things that are important to you. Above all, it will teach you how to run your circus, instead of letting the circus run you. The Cynics were an influential school of philosophers in ancient times - the prime influence on the Stoics - but it is hard to understand why. Their name comes from the Greek word for "dog," and they behaved something like stray dogs, living on the street, acting shamelessly, attacking their enemies fiercely. This book contains the longest surviving fragments of writing by a Cynic philosopher. The introduction shows that the fragments are enough for us to reconstruct the entire book was like. It also explains the Cynics' influence on the Stoics. Both

wanted to be independent of good or bad fortune, so both believed that only virtue was important. Both believed that virtue consisted in living according to nature, but they had different ideas of what this meant. The Cynics believed that we must reject the comforts and conventions of civilization to live in accordance with nature- even defending incest and cannibalism. The Stoics made themselves much more respectable by substituting ideas of living according to nature that they borrowed from Aristotle and Plato.

In 2009, high-profile fraud cases like the Ponzi schemes of Bernard Madoff and Arthur Nadel vividly illustrated the harm done to investors who placed their trust in these apparently successful money managers and then discovered their money had never been invested at all. News stories featured 90-year-olds forced by necessity to work in supermarkets, elderly people losing their homes because their life savings were gone, and wealthy retirees suddenly unable to pay their electricity bills. Charities were forced to curtail their services, lay off staff, and even close their doors forever as their funds evaporated. Almost every day, there are stories in the media about dishonest employees who have robbed their organisations of hundreds of thousands of dollars. Not so well-publicised are the countless smaller thefts occurring every day from cash registers, warehouses, and business bank accounts. Sadly, the organisations that have the most to lose small businesses, family-run companies, churches, and charities are often the most vulnerable because of their size and inexperience. According to the Association of Certified Fraud Examiners, accounting fraud cost over \$994 billion in 2008, and the average organisation lost 7 percent of its
