

Professor Astro Gatto E Le Frontiere Dello Spazio Ediz Illustrata

"An irreverent, modern-day, romantic comedy!" The Hutchinson sisters grew up under the piercing, pious stare of a preacher's wife. Plagued by her ever-disappointed refrain, "Well, it's not my favorite." Their search to find their own way in the world has not been a screaming success. Gwenn is a good girl, a responsible girl ... a miserable girl. Her steady diet of vivid fantasies is the only part of her life she enjoys. She daydreams of new parents, a more exciting job and an actual love life. She struggles to run a business as "The Organizer," while she stacks relationship carcasses in the closet of her own completely unorganized life. Her only real friend is her younger sister, Rachel. Rachel is outgoing, risqué and happily gay. The only people who don't know this little secret are her judgmental parents, Pastor Ed and Shirley. Rachel struggles mightily to dodge her mother's constant attempts to set her up with "nice Christian boys"; while holding down a job at the bakery and keeping up with her rock-star girlfriend! Gwenn uncovers a photo that brings her imaginary world careening into reality. She's forced to ask herself if wealthy artist Daniel Gregory is the answer she's been seeking or a grand delusion. Break-ups, meltdowns, family secrets, wild nights and finally a journey of self-discovery to exotic New Zealand keep Gwenn and Rachel stumbling toward independence. So grab your parka and join the Hutchinson girls, as they experience the Lake Effect in Duluth, Minnesota!"

Observations of neutrinos being emitted by the supernova SN1987A, star neutrinos, and atmospheric neutrinos have provided new insights into astronomy, as well as new unresolved phenomena such as the solar neutrino problem, spurring investigative studies among particle physicists and astrophysicists. One of the most important features of this book is its enumeration of a number of basic properties of neutrinos and their relationship to Grand Unified Theories, focusing on the origin of the neutrino's mass and the generation mixing of neutrinos. All the kamiokande results, detector performances, and complete references are included.

With over 70,000 copies of the first edition in print, this radical treatise on public education has been a New Society Publishers' bestseller for 10 years! Thirty years in New York City's public schools led John Gatto to the sad conclusion that compulsory schooling does little but teach young people to follow orders like cogs in an industrial machine. This second edition describes the wide-spread impact of the book and Gatto's "guerrilla teaching." John Gatto has been a teacher for 30 years and is a recipient of the New York State Teacher of the Year award. His other titles include A Different Kind of Teacher (Berkeley Hills Books, 2001) and The Underground History of American Education (Oxford Village Press, 2000).

This is an account of one of life's most painful experiences--the sudden death of a child. A mother's anguish compels her to examine beliefs about what comes after death and to explore ancient healing methods in Mexico, Brazil, and Bali. At its core a spiritual odyssey, The Sacred Wound is about creating meaning from life-shattering events--events which can utterly destroy us or serve as a call to extraordinary courage and growth. A life-shattering event is a modern day "sacred wound," a wounding so profound that it pierces the soul and penetrates the veils of who we are and what we think life is about. Like a mythological hero, we will emerge from the ordeal another person. As the author says, "For three years grief was my consort, it became my teacher." This inspiring and searingly honest book is about more than survival following the death of a loved one; it is about the gift in tragedy's other hand. It is about discovering the truth that love is the central experience of life and not simply mortality, and that this truth can emerge in ways we can never predict or expect

The latest Professor Astro Cat adventure is perfect for curious young scientists who want to learn more about the ins and outs of the human body! Are our ears supposed to be a weird shape? Why do we sneeze? What is the point in having skin? The human body is one of the most complicated things in the Universe. Join Professor Astro Cat and the whole gang as they journey through all the wondrous parts of the human body, with the help of writer Dominic Walliman himself! From head to toe and everywhere in-between, there's nothing left out of this fascinating human body odyssey!

From the author of the bestselling book 50 Things to See with a Small Telescope, this colorful edition explores the constellations with young readers, guiding them to dozens of galaxies, nebulae, and star clusters. Every page features a helpful "telescope view," showing exactly how objects appear through a small telescope or binoculars. While a member of the Mount Diablo Astronomical Society in California, John Read taught thousands of students how to use telescopes and explore the night sky. Now, he's sharing this knowledge with you! Even without a telescope, this introduction to the night sky is essential for every child's collection.

So where are your family and friends going to spend eternity - heaven or hell? You can make the difference. I hear many Christians say, "I want to witness, but what do I say?" Many times the hardest part in witnessing is just getting started. When fear grips or they get tongue tied Christians often wonder: "How do I segue this conversation onto the Gospel track?" This is a huge problem because if a Christian does not know how to transition a conversation onto the Gospel track, then they will not be witnessing at all. This book is the solution that contains over 400 icebreakers to help get you started. These icebreakers are friendly and easy to use and they are listed by location so that you can witness to the lost wherever you go. Many Christians wait to share the Gospel until Christmas or Easter. Many times that is too late because so many young people are killed instantly through car wrecks, drug overdoses or drive by shootings and even middle-aged people die suddenly of heart attacks or some other illness. No one ever knows when their last day on earth will be. It will stir your compassion and give you the needed courage to witness to the lost wherever you go Please be kind, use loving boldness and remember that God is love. All 400 icebreakers are organized in sections under headings: I Want to Witness, But What Do I Say - Around: Entertainment; Financial Affairs; Food; Healthcare; Holidays and Special Times; the Great Outdoors; Shopping or Doing Errands; Sports, Work and Traveling. There is a handy INDEX in the back! Each section contains 7 to 9 different "object evangelism icebreakers." God gave the ideas for these icebreakers when He revealed to me that Jesus taught using objects in his environment in Matthew 13 using parables. Christians can witness like Jesus did through taking an object and making a comment that relates to the Gospel in some way, which makes a great transition or segue into the topic of the Gospel. For e.g.: WATER - "This water reminds me of the living water. Have you ever had any of that water?" Or DOOR - "This door reminds me of what Jesus said (John 10:9) that He is the DOOR to eternal life. Have you ever walked through that door?" Or DOWNLOAD - "Downloading this file or picture reminds me of the time I downloaded Jesus into my heart. Have you ever done that download?" SALT & PEPPER - "These salt and pepper shakers remind me of the Kingdom of Light and the Kingdom of darkness." Or BREAD - This bread reminds me of what Jesus said: "I Am the Bread of Life. He who comes to Me will never go hungry," (John 6:35). Or SUGAR - This sugar reminds me of how sweet it is to trust in Jesus. After you say the icebreaker, you LISTEN to what they say in response and then be led by the spirit in what you say next. It is a "no fail" way to witness to the lost because, even if they do not accept Jesus at that moment, the object is still there to continue to remind them of what you said long after you are gone. After you say the icebreaker, the chapter "Truth to Say to 13 False Religions" will help you even more to witness to: Atheists & Evolutionists, Buddhists, Hindus, Jehovah Witnesses, Jewish people, Mormons, Muslims, New Agers, Scientologists, Unitarian Universalists and Homosexuals and Lesbians. There is also a chapter called Prophetic Evangelism that teaches you how to witness using a word of knowledge that God gives you to deliver a prophetic word to witness to the lost. There are several testimonies that show you, "Yes, it works!" About Rev. Susan Nazarewicz: Susan graduated from the UNC at Chapel Hill (B.A.); RHEMA Bible Training College, Victory World Missions Training Center, Church On the Move School of Ministry and Prophetic Age Ministries Institute and is ordained by John G. Lake Ministries. She works as a prayer partner at Oral Roberts Ministries at the

Abundant Life Prayer Group and is a member at RHEMA Bible Church in Tulsa, OK where she sings in the choir.

Is this world all that exists, or are there one or more invisible dimensions in the universe that also harbor sentient beings? In *The Astral Plane: Its Scenery, Inhabitants and Phenomena*, esoterica expert C.W. Leadbeater brings together centuries of information about one much-hypothesized-about realm, the so-called astral plane. Whether you are a believer in unseen phenomenon or a skeptic, it makes for a fascinating read.

Young readers (and cats!) discover the wonders our solar systems as they travel to each of the planets in turn!

Textbook of Clinical Neuropsychiatry provides a comprehensive, encyclopedic and up to date coverage of the complete range of neuropsychiatric disorders. The text is clearly written and well organized, utilizing a consistent and easy to read format throughout. Part I describes the diagnostic assessment of patients and details the interview, mental status examination, neurologic examination and ancillary investigations. Part II provides a thorough description of the clinical features of the signs, symptoms and syndromes seen in neuropsychiatric practice, with special emphasis on the multiple disorders and lesions that may cause them. Part III goes on to present virtually all of the specific disorders seen in neuropsychiatric practice, in each case detailing clinical features, course, etiology, differential diagnosis and treatment. The authoritativeness, comprehensiveness and lucid organization of *Textbook of Clinical Neuropsychiatry* make it an essential reference for psychiatrists and neurologists alike, and for students in those disciplines.

Professor Astro Cat: the expert in just about anything. In this book, he's showing off everything he knows about space.

Biogenic amines are bioactive compounds distributed in foods of all origins. Apart from their fundamental role in many bodily functions, there has recently been great interest in their toxicological potential, much research is being carried out to understand their occurrence related to both desired and undesired fermentative phenomena, chemical spoilage, low hygienic conditions, wrong handling, and criticism about technological factors of process and storage conditions. All these causes can contribute to a higher content of biogenic amines in food, particularly of those hazardous to human health. This book aims to collect scientific studies looking for new tools to limit the over-production of biogenic amines in food, search for new food sources of biogenic amines, and to spotlight the concept of safe food and bioactive amines content.

Use the power of Eastern Astrology to unleash your prosperity potential. This Book enables everyone to use the power of cycles pertaining to the planets for personal financial gain. In a search to alleviate the massive problems humanity has concerning financial lack Joni focused on the issues of money and astrology. Through self analysis she found the many deep rooted emotional issues we use to imprison ourselves. It is actually our relationship with money that reveals our own self worth. We innately believe money is bad and poverty buys us a ticket to heaven. All these deep seated beliefs are instilled in us at a very early age. But by understanding that money is energy we can shift our mindset from poverty to prosperity. Cycles of the Planets have influenced the cycles of our social climate and financial trends. These cycles are the natural trends that create balance. With knowledge of the future trends you can make your plans accordingly with the advantage of this powerful edge. You can use astrology to understand these cycles and use them for YOUR best timing to achieve your goals. All the information gleaned from analyzing wealth through the planetary cycles, billionaire's charts, the stock market, and lottery winners relates to YOU and how YOU can use astrology to create your best timing to achieve wealth and prosperity.

This book devotes a chapter to each RTK family and the multiple receptors within each family, thoroughly covering all of the RTKs. The chapters all follow the same structure, presenting this essential information in an accessible and user-friendly format. Each chapter covers one specific family of receptors and begins with a general introduction to that family and a comprehensive discussion of that receptor's family in development and human disease. Following are in-depth analyses of each family's receptors with discussions on the gene, protein, ligands, activation, and signaling pathways along with discussion of receptor processing and signal attenuation. Further, cross talk with other receptors systems, post-translational modification and specific unique characteristics to each RTK are discussed. Because it isolates and explains each family, this book is an essential companion volume to *Receptor Tyrosine Kinases: Structure, Functions and Role in Human Disease*, by the same authors, which talks about RTKs more generally and without the family-by-family detail.

La vicenda - mentre a Roma si sta riunendo il conclave per l'elezione del nuovo papa - e ambientata ad Almeda, un paese immaginario della Sicilia occidentale, in un tempo ambiguo, in un'atmosfera percorsa dal senso della fine e del male. Un umile impiegato di provincia, Taddeo Medina, attore dilettante di sacre rappresentazioni, improvvisamente durante la recita del Mortorio impazzisce, un suo amico, Temistocle Gasdia, che interpreta Giuda muore sulla scena. Tre loro amici, appassionati come i primi di funerali, sotto la guida di uno dei tre, Vargas, si prendono cura del folle. Partendo da una strana lettera trovata nel copione del Gasdia, in un cui si parla di un Protocollo per l'elezione del papa, mentre si occupa con gli amici del folle Taddeo che progressivamente si trasforma in poeta musico e infine in maestro e profeta (tra gli altri, Lao-tzu, Confucio, Krishna, Milarepa, Padmasambhava, San Francesco, Ahmed, Salomone, Y.), Vargas indaga.

From the first amateur leagues of the 1860s to the exploits of Livan and Orlando "El Duque" Hernandez, here is the definitive history of baseball in Cuba. Roberto Gonzalez Echevarria expertly traces the arc of the game, intertwining its heroes and their stories with the politics, music, dance, and literature of the Cuban people. What emerges is more than a story of balls and strikes, but a richly detailed history of Cuba told from the unique cultural perch of the baseball diamond. Filling a void created by Cuba's rejection of bullfighting and Spanish hegemony, baseball quickly became a crucial stitch in the complex social fabric of the island. By the early 1940s Cuba had become major conduit in spreading the game throughout Latin America, and a proving ground for some of the greatest talent in all of baseball, where white major leaguers and Negro League players from the U.S. all competed on the same fields with the cream of Latin

talent. Indeed, readers will be introduced to several black ballplayers of Afro-Cuban descent who played in the Major Leagues before Jackie Robinson broke the color barrier once and for all. Often dramatic, and always culturally resonant, Gonzalez Echevarria's narrative expertly lays open the paradox of fierce Cuban independence from the U.S. with Cuba's love for our national pastime. It shows how Fidel Castro cannily associated himself with the sport for patriotic p.r.--and reveals that his supposed baseball talent is purely mythical. Based on extensive primary research and a wealth of interviews, the colorful, often dramatic anecdotes and stories in this distinguished book comprise the most comprehensive history of Cuban baseball yet published and ultimately adds a vital lost chapter to the history of baseball in the U.S.

In this stimulating how-to book, a scientist Dr. Dan Swan (D.Engr.) provides an answer to one of life's most important questions, "How in the world does one find miracles?" When a miracle occurred in his life in 1994 at a time when he desperately needed it. This miracle caused a series of revelations that ultimately led him down a spiritual path, completely changing his busy life, his scientific mindset and the way he viewed this chaotic world. Taking the reader on a fascinating tour of his real-life experience, Dr. Swan explains how he began his spiritual journey by learning hands-on energy healing in order to help save his father who had suffered a major stroke. Through his real-life experience as an energy healer, using the healing power from God, he found that miracles happened to patients who were ordinary people like you and him. He witnessed that miracles do happen many times to people who are in desperate need. From his experience, he shows in this book that anyone can become an energy healer and be able to heal loved ones and family members. People of all religious faiths as well as non-believers can transform their physical bodies to Light bodies using the healing power from God. In fact, all major religions including Christianity, Hinduism, and Buddhism, encourage people to make the higher transformation to a union with God or Universal Consciousness. And, he shows the reader step-by-step of how to do it. Using Dr. Swan's method, the spiritual journey can be completed in a short period of time. He successfully merges new scientific findings with ancient wisdom, resulting in an easy-to-understand guide for someone at any spiritual level. Readers will learn from leading quantum physicists and medical doctors, as well as spiritual teachers from around the world. Dr. Swan's instructions set the stage for a spiritual voyage of self-discovery. His book is a timely guide for the year 2012 and beyond, preparing all of us for the age of the New Earth in the near future.

Yoga Secrets: 52 Life-Changing Secrets. Calm your pain, stress, and anxiety and find more energy, happiness, and meaning in your life. Create lasting happiness in your life. Enjoy more success and meaning. Learn to overcome the daily challenges from health, work, and relationships. These 52 easy to use lessons follow the ancient wisdom of the Eight Limbs of Yoga from the Yoga Sutras. The lessons can help open your heart on your journey toward enlightenment and joy. Ken Heptig presents a system with 52 lessons, refined while teaching thousands of yoga classes. He improved the lessons for simplicity and clarity until his students could absorb the lessons while practicing different levels of yoga. This book is suitable for anyone with or without a physical practice of yoga. You can use the lessons on your own or add them to a group activity like sporting events, classrooms, and certainly yoga classes.

"Narratore, autentico e instancabile, della razza di un Georges Simenon", come lo definì fulmineo Oreste del Buono, Giorgio Scerbanenco veniva da lontano, da quella Russia zarista che lasciò ancora in fasce e che lo accompagnerà per sempre nel suono di un cognome diventato il marchio del maestro indiscusso del noir italiano. La vita di Scerbanenco, ricostruita in questo libro per la prima volta dalla figlia Cecilia attingendo a un'ampia mole di documenti dall'archivio di famiglia, ha il ritmo della sua scrittura: instancabile, multiforme, tagliente nell'indagare le sottigliezze dell'animo umano, illuminata dall'ironia. Una scrittura al servizio dei lettori dapprima nelle redazioni dei giornali e dei periodici con cui collabora dagli anni '30, segnalato da Cesare Zavattini che aveva intuito il talento di quel giovane che batteva sui tasti della macchina da scrivere. Negli anni '60 arriva finalmente il successo in libreria con la serie di romanzi con protagonista Duca Lamberti, che gli valgono la consacrazione internazionale: dopo una vita nell'ombra, spesso scrivendo sotto pseudonimo, la stella di Scerbanenco poteva finalmente brillare. L'autore di Venere privata e Milano calibro 9 rivive in queste pagine nelle sue molteplici scritture, dal rosa al giallo, dalla radio al cinema, e in un'inedita dimensione privata, piena di sorprese e inquietudini come la trama di uno dei suoi romanzi.

This collection of reviews contains contributions by internationally recognized immunologists and molecular and cellular neurobiologists. Uniquely, it puts side by side cellular communication devices and signaling mechanisms in the immune and nervous systems and discusses mechanisms of interaction between the two systems, the significance of which has only recently been fully appreciated.

Professor Astro Cat is back to explain the world of physics!

All students of mathematics know of Peano's postulates for the natural numbers and his famous space-filling curve, yet their knowledge often stops there. Part of the reason is that there has not until now been a full-scale study of his life and works. This must surely be surprising, when one realizes the length of his academic career (over 50 years) and the extent of his publications (over 200) in a wide variety of fields, many of which had immediate and long-term effects on the development of modern mathematics. A study of his life seems long overdue. It appeared to me that the most likely person to write a biography of Peano would be his devoted disciple Ugo Cassina, with whom I studied at the University of Milan in 1957-58. I wrote to Professor Cassina on 29 October, 1963, inquiring if he planned to write the biography, and I offered him my assistance, since I hoped to return to Italy for a year. He replied on 28 November, 1963, suggesting that we collaborate, meaning by this that I would write the biography, in English, using his material and advice. I gladly agreed to this suggestion, but work on the project had hardly begun when Professor Cassina died unexpectedly on 5 October, 1964. I then decided to continue the project on my own. I spent the academic year 1966-67 in Turin; completion of the book took ten years.

Can artificial intelligence learn mathematics? The question is at the heart of this original monograph bringing together theoretical physics, modern geometry, and data science. The study of Calabi–Yau manifolds lies at an exciting intersection between physics and mathematics. Recently, there has been much activity in applying machine learning to solve otherwise intractable problems, to conjecture new formulae, or to understand the underlying structure of mathematics. In this book, insights from string and quantum field theory are combined with powerful techniques from complex and algebraic geometry, then translated into algorithms with the ultimate aim of deriving new information about

Calabi–Yau manifolds. While the motivation comes from mathematical physics, the techniques are purely mathematical and the theme is that of explicit calculations. The reader is guided through the theory and provided with explicit computer code in standard software such as SageMath, Python and Mathematica to gain hands-on experience in applications of artificial intelligence to geometry. Driven by data and written in an informal style, The Calabi–Yau Landscape makes cutting-edge topics in mathematical physics, geometry and machine learning readily accessible to graduate students and beyond. The overriding ambition is to introduce some modern mathematics to the physicist, some modern physics to the mathematician, and machine learning to both.

Come and listen! THE HEBREW LETTERS SPEAK! We are the Aleph-Beit, the Letters of the Hebrew Alphabet, the building blocks of Creating. "As Letters, we bring forth love to the world from our realm of Oneness. Our responses to your questions and concerns present endless possibilities. Some information is new. Some responses reflect back what you may already know ... with a reminder for emphasis. Some expand and deepen understanding. Some share a story! "We welcome you as friends. Age is no limit.

Circumstance is no barrier. Ideas we bring forward will offer emotional support, mystical awareness, and sometimes, humor. "Meditate with us! There may be surprises!"

How do you respond to unfairness? How do you play fair if the rules are rigged? The gift of dwarf planet Eris is the coping skills to creatively navigate and outwit foes on unlevel playing fields and find a cause to champion. This guide covers Eris' journey in the 12 houses and aspects with other planets; conjunction, semi-sextile, sextile, square, trine, quincunx and opposition. The author gives a fun memory-tool, the "A-B-C's of Eris" to help you know the ways Eris impacts the chart. Examples of 300+ famous people with Eris aspects brings the interpretations alive. Amy Shapiro was the first to call Eris a 'Provocateur' (in Forces At Work: Astrology And Career), based on Eris' legendary golden apple exposing over-sized egos. Her job is to awaken our higher impulses. This book extends a long-awaited invitation to Eris -- to join the astrological party as the guest of honor! Reviewers' Comments: "Amy Shapiro has 'done it again' in providing us with a far more useful interpretation of planet Eris than the 'goddess of discord' label originally received from her discoverers. As Provocateur, Eris has a huge variety of ways her placements by sign, house and aspect can be interpreted. Invite Eris to your party and open yourself to be provoked to new and interesting perspectives!" Maria Kay Simms, author: Moon Tides, Soul Passages; Dial Detective; Your Magical Child and Astrology and the Power of Eight "As Oscar Wilde once said, 'The only thing worse than being talked about, is not being talked about.' For years astrologers have not been talking about Eris. Inviting Eris To The Party is a fine book that adds a lot to the discussion of Eris and should get tongues wagging. It may get astrologers thinking about Eris the way they have been thinking about Chiron all these years." Tom Canfield, author: Yankee Doodle Discord: A Walk with Planet Eris Through USA History, and Eris In Signs, Houses, Aspects

Professor Astro Gatto e le frontiere dello spazio Professor Astro Cat's Frontiers of Space Professor Astro Cat

The dramatic story of neighbors in a small Danish fishing village who, during the Holocaust, shelter a Jewish family waiting to be ferried to safety in Sweden. It is 1943 in Nazi-occupied Denmark. Anett and her parents are hiding a Jewish woman and her son, Carl, in their cellar until a fishing boat can take them across the sound to neutral Sweden. The soldiers patrolling their street are growing suspicious, so Carl and his mama must make their way to the harbor despite a cloudy sky with no moon to guide them. Worried about their safety, Anett devises a clever and unusual plan for their safe passage to the harbor. Based on a true story.

This open access book explores commentaries on an influential text of pre-Copernican astronomy in Europe. It features essays that take a close look at key intellectuals and how they engaged with the main ideas of this qualitative introduction to geocentric cosmology. Johannes de Sacrobosco compiled his Tractatus de sphaera during the thirteenth century in the frame of his teaching activities at the then recently founded University of Paris. It soon became a mandatory text all over Europe. As a result, a tradition of commentaries to the text was soon established and flourished until the second half of the 17th century. Here, readers will find an informative overview of these commentaries complete with a rich context. The essays explore the educational and social backgrounds of the writers. They also detail how their careers developed after the publication of their commentaries, the institutions and patrons they were affiliated with, what their agenda was, and whether and how they actually accomplished it. The editor of this collection considers these scientific commentaries as genuine scientific works. The contributors investigate them here not only in reference to the work on which it comments but also, and especially, as independent scientific contributions that are socially, institutionally, and intellectually contextualized around their authors.

Dr. Oskar Adler was a major influence in the cultural life of pre-WWII Vienna, Austria and is still considered today to be the "father" of the Munich-based school of psychological astrology. Amy Shapiro creates a portrait of Adler with letters and memoirs of those who knew him or knew of him, including Albert Einstein, Hans Keller, Louis Krasner, Arnold Schoenberg and many others. First published as an e-book, this print volume has more stories, photos and reflections. Adler was a musician, MD, philosopher, author and astrologer who became a WWII intellectual refugee. He wrote The Testament of Astrology in 7 volumes (also available) and The Critique of Pure Music.

Far into the future after years of technological advancement the relationship between humans and robots is changing. Reduced energy stores means humans can no longer rely on the support of their technological counterparts. In the midst of this turmoil one woman faces her own heartbreak at the hands of a manipulative friend. Jeremy Soresé explores how heartbreak can make us feel like the center of the universe and how the realization that we aren't is often more painful than heartbreak itself. A stunning debut of futuristically epic proportions that juxtaposes the mechanical breakdown of the world against a compellingly quiet and human tale. Jeremy Soresé was born in Berlin, raised in Virginia, and educated in Georgia at the Savannah College of Art and Design before becoming a resident of La Maison des Auteurs in Angoulême, France. He is the creator and current writer of the Steven Universe comic series, published monthly by BOOM studios. He lives in Brooklyn, New York.

A part of Harper Perennial's special "Resistance Library" highlighting classic works that illuminate our times: A special edition reissue of Stanley Milgram's landmark examination of humanity's susceptibility to authoritarianism. "The classic account of the human tendency to follow orders, no matter who they hurt or what their consequences." — Washington Post Book World In the 1960s, Yale University

psychologist Stanley Milgram famously carried out a series of experiments that forever changed our perceptions of morality and free will. The subjects—or “teachers”—were instructed to administer electroshocks to a human “learner,” with the shocks becoming progressively more powerful and painful. Controversial but now strongly vindicated by the scientific community, these experiments attempted to determine to what extent people will obey orders from authority figures regardless of consequences. “Milgram’s experiments on obedience have made us more aware of the dangers of uncritically accepting authority,” wrote Peter Singer in the New York Times Book Review. With an introduction from Dr. Philip Zimbardo, who conducted the famous Stanford Prison Experiment, Obedience to Authority is Milgram’s fascinating and troubling chronicle of his classic study and a vivid and persuasive explanation of his conclusions.

This volume is an important re-evaluation of space and spatiality in the late Renaissance and early modern period. History of science has generally reduced sixteenth and seventeenth century space to a few canonical forms. This volume gives a much needed antidote. The contributing chapters examine the period’s staggering richness of spatiality: the geometrical, geographical, perceptual and elemental conceptualizations of space that abounded. The goal is to begin to reconstruct the amalgam of “spaces” which co-existed and cross-fertilized in the period’s many disciplines and visions of nature. Our volume will be a valuable resource for historians of science, philosophy and art, and for cultural and literary theorists.

Designed for astronomers worldwide, the almanac provides details of thousands of astronomical events from 2016 through to the end of 2020. Written by a former freelance writer for Astronomy magazine, the guide includes almost daily data and information on the Moon and planets, as well as Pluto, Ceres, Pallas, Juno and Vesta: * The phases of the Moon * Conjunctions between the Moon, planets and asteroids (including angular separation for conjunctions involving the planets and asteroids.) * Lunar and Solar eclipses * Annual summaries of when to observe the planets and asteroids * Annual summaries of notable close planetary conjunctions * Peak dates for the major meteor showers with moon phase * Dates of perihelion, aphelion, perigee and apogee for the planets and asteroids * Inferior and Superior conjunction for Mercury and Venus * Greatest Eastern and Western elongation for Mercury and Venus * Opposition and solar conjunction dates for the outer planets and asteroids * Apparent diameter changes for the planets * Magnitude changes for the planets and asteroids * Constellation changes for the Sun, planets and asteroids * Dates of the equinoxes and solstices Whether you're an expert astronomer or a casual star gazer, the almanac is the essential guide for observers everywhere. (The first edition, detailing 2015-2019, has been downloaded nearly 6,000 times and has sold hundreds of paperback copies. It was ranked #1 in Free Kindle Astronomy books, #3 in Paid Kindle Astronomy books and within the Top 50 of ALL Free Kindle Books.)

Digital web comic compiled. Contains 10 issues plus a "Making of" special.
