The objects displayed on a table can take multiple forms. In meetings, it is still very often printed paper although its content was originally created on a computer. The content can also be a “table”, but now in the mathematical sense, showing, e. g. , the budget of a project. Then, we have a “table” on the table. Most often, the computer-generated contents are subject of frequent changes or dynamic in nature. It is a logical consequence to avoid the detour and the inherent media break by transforming the surface of the table into a display able to show media that are active and can be computer-generated and computer-controlled. At the same time, it is desirable to maintain the inherent features and affordances of working with the objects and the contents while sitting or standing around a table. Electronic Meeting Rooms On the basis of these and other elaborate considerations, we started to design in 1992/1993 an electronic meeting room in Darmstadt at GMD-IPSI (later Fraunhofer IPSI). The setup of our custom-built DOLPHIN-System consisted of a “traditional” large rectangular wooden table with four physically integrated workstation-like computers with at screens. This set-up was complemented by linking a large ver- cal pen-operated interactive display, at that time the rst LiveBoard outside of Xerox PARC (two of which I was able to get to Darmstadt after my stay at Xerox PARC in 1990).

The Wish is a short, sharp, chilling story from Roald Dahl, the master of the shocking tale In The Wish, Roald Dahl, one of the world's favourite authors, tells a sinister story about the darker side of human nature. Here, an imaginative boy plays a game that quickly gets out of hand . . . The Wish is taken from the short story collection Someone Like You, which includes seventeen other devious and shocking stories, featuring the wife who serves a dish that baffles the police; a curious machine that reveals the horrifying truth about plants; the man waiting to be bitten by the venomous snake asleep on his stomach; and others. 'The absolute master of the twist in the tale.' (Observer) This story is also available as a Penguin digital audio download read by the sublime Stephen Mangan. Roald Dahl, the brilliant and worldwide acclaimed author of Charlie and the Chocolate Factory, James and the Giant Peach, Matilda, and many more classics for children, also wrote scores of short stories for adults. These delightfully disturbing tales have often been filmed and were most recently the inspiration for the West End play, Roald Dahl's Twisted Tales by Jeremy Dyson. Roald Dahl's stories continue to make readers shiver today.

The Bible contains passages that allow both scholars and believers to project their hopes and fears onto ever-changing empirical realities. By reading specific biblical passages as utopia and dystopia, this volume raises questions about reconstructing the past, the impact of wishful imagination on reality, and the hermeneutic implications of dealing with utopia – “good place” yet “no place” – as a method and a concept in biblical studies. A believer like William Bradford might approach a biblical passage as utopia by reading it as instructions for bringing about a significantly changed society in reality, even at the cost of becoming an oppressor. A contemporary biblical scholar might approach the same passage with the ambition of locating the historical reality behind it – finding the places it describes on a map, or arriving at a conclusion about the social reality experienced by a historical community of redactors. These utopian goals are projected onto a utopian text. This volume advocates an honest hermeneutical approach to the question of how reliably a past reality can be reconstructed from a biblical passage, and it aims to provide an example of disclosing – not obscuring – pre-suppositions brought to the text. With examples and cross-references throughout, the monumental, easy-access *AMA Handbook of Business Writing* is an indispensable desktop reference for every business professional. --Book Jacket.

This book presents a comprehensive overview of the roles of β -amino acids and latest research findings, to reveal their fascinating aspects and to facilitate better understanding of their important roles in physiology and diseases. It also provides useful hints for the development of drugs and functional foods. β -Amino acids were once called unnatural amino acids and were considered to be insignificant for eukaryotes especially in mammals. However, different β -amino acids have been revealed to be distributed in various mammalian tissues and to bear important physiological roles. For example, β -serine is implicated in memory formation and learning, and its abnormal concentration in tissues have been reported in neurological diseases such as schizophrenia and amyotrophic lateral sclerosis. β -Aspartate is found in a variety of mammalian tissues, particularly in the central nervous system and the genitals. β -Aspartate facilitates the endocrine secretion of prolactin, inhibits the secretion of melatonin, and plays a peculiar role in the control of reproductive functions in mammals, including the stimulation of testosterone synthesis. Written by the leading scientists in the field, this book is a valuable source of information for researchers in biochemistry, physiology, and neuroscience, as well as in the pharmaceutical and food industries.

Hughes's last collection of poems commemorates the experience of Black Americans in a voice that no reader could fail to hear—the last testament of a great American writer who grappled fearlessly and artfully with the most compelling issues of his time. “Langston Hughes is a titanic figure in 20th-century American literature ... a powerful interpreter of the American experience.” —The Philadelphia Inquirer From the publication of his first book in 1926, Langston Hughes was America's acknowledged poet of color. Here, Hughes's voice—sometimes ironic, sometimes bitter, always powerful—is more pointed than ever before, as he explicitly addresses the racial politics of the sixties in such pieces as "Prime," "Motto," "Dream Deferred," "Frederick Douglas: 1817-1895," "Still Here," "Birmingham Sunday." " History,"

"Slave," "Warning," and "Daybreak in Alabama."
