The key novelty of this book is first of all in the successful attempt to conduct jointly modeling of environment in terms of physical environment related parameters and measuring similar parameters by means of multispectral remote sensing, primarily by means of passive microwave remote sensing technology. Another new step is in the development and utilization of a multilevel approach which includes remote sensing of the land and water parameters like soil moisture, depth to water table, biomass of vegetation, temperature and salinity of water, in situ measurements of similar parameters and incorporation of GIS and data sets into the models of typical environments. The part of book, which contains remote sensing is focused on multipurpose observations from aircraft obtained in many soil-climatic zones in different countries and is reach of the examples of practical application. Applied mathematicians, geophysics, hydrologists, socio-economists, statesmans and other researchers of environmental changes will find a wealth of information and ideas in this book.

The traditionally separate Fixed, Mobile, and Internet sectors have been evolving recently toward a single sector, offering numerous implications for those involved in technology and business. It is therefore essential for telecommunication professionals to get a keen grasp of where the industry is heading. Providing a solid foundation in the industry, *Introduction to Mobile Communications: Technology, Services, Markets* explores the core requirements of modern mobile telecommunications—from markets to technology. It explains how wireless systems work, how mobility is supported, the underlying infrastructure, and what interactions are needed among the different functional components. The book also examines how mobile communications are evolving in order to meet the changing needs of users. The information provided in the book comes primarily from the four core modules of the Certificate in Mobile Communications Distance Learning program run by the Informa Telecoms Academy in London. Designed by a highly experienced training development team, the program examines the complex and fascinating world of mobile communications. Designed to give a broad picture of mobile communications, the book provides an excellent grounding for those involved in both business and engineering—leaving them much better equipped to fulfill roles within their current or prospective companies.

Financial Risk Management and Derivative Instruments offers an introduction to the riskiness of stock markets and the application of derivative instruments in managing exposure to such risk. Structured in two parts, the first part offers an introduction to stock market and bond market risk as encountered by investors seeking investment growth. The second part of the text introduces the financial derivative instruments that provide for either a reduced exposure (hedging) or an increased exposure (speculation) to market risk. The fundamental aspects of the futures and options derivative markets and the tools of the Black-Scholes model are examined. The text sets the topics in their global context, referencing financial shocks such as Brexit and the Covid-19 pandemic. An accessible writing style is supported by pedagogical features such as key insights boxes, progressive illustrative examples and end-of-chapter tutorials. The book is supplemented by PowerPoint slides designed to assist presentation of the text material as well as providing a coherent summary of the lectures. This textbook provides an ideal text for introductory courses to derivative instruments and financial risk management for either undergraduate, masters or MBA students.

Discover the truth behind the headlines in Victoria Beckham's fascinating memoir, Learning to Fly. 'Juicy and compelling' Heat 'Extraordinary... compelling and honest, devastatingly frank... like a rummage through a close friend's private diary' Daily Mail 'The sensational autobiography of one of the most photographed and talked-about women in the world' Mail on Sunday From the time she saw the movie Fame, Victoria wanted to be a star. A line from the theme song stayed with her - 'I'm gonna live for ever, I'm gonna learn how to fly.' With this amazing book she gives us the chance to fly alongside her on her journey from lonely teenager to international star. This is the real Victoria Beckham, telling us what it's like to be part of the most watched couple in Britain. Standing up for herself, David and Brooklyn, and setting the record straight about controversies that have surrounded her. She reveals the truth behind the beginnings of the Spice Girls, her wedding, her health and the terrifying kidnap and death threats. And what it took for little Victoria Adams to become the star she is today, and why she wanted it so much. Incredibly frank and told with coruscating humour, Victoria Beckham's autobiography Learning to Fly is more compelling than any novel. Victoria Beckham rose to fame as a member of the Spice Girls who have sold over 55 million records world-wide. She is now an internationally recognized style icon with her own denim brand called dVd Style, a range of sunglasses and fragrances named Intimately Beckham and has also produced a range of handbags and jewelry. Victoria has published two bestselling books: Learning to Fly and That Extra Half an Inch. She is married to footballer David Beckham, and they have four children.

Malacca Reminiscences My Story is a memoir of a resident of Malacca in the five decades after independence in 1957 of Malaysia from Britain. Most books on Malacca hark back to the fifteenth century and the era of Parameswara founding the Sultanate of Malacca, but very little on the modern events that have shaped Malacca to become very different from the sleepy hollow that it was. The book captures the spirit of such a modern and vitalized city that has gained world heritage status. While many tourists from overseas and other parts of Malaysia visit Malacca for a few days or a week, they walk the streets of the town without understanding the layers of history that are hidden under these streets. While describing the streets, the bridges, the foods and eateries, the antiques shops, and the nooks and corners of the town, I have woven bits and pieces of my experiences as a resident of the town, born and bred since the 1950s. It is not a memoir per se but a tapestry of the story of Malacca stitched with anecdotes of personalities and ordinary folk of the town in the last fifty years. A Malacca street like Heeren Street has many secrets to unfold, and every house or building along this famous street has a worthy story to tell. It would be impossible to dig into the details of every house, but the mansions of the rich and famous towkays will be told. In short, this book of about 150 pages will paint Malacca in colors that are different from the average travel book from Lonely Planet or Fordor, which are compendiums about cities but do not touch the heart of the matter. I have been influenced by the travel writings of Peter Jenkins and Bill Bryson, whose travel books breathe life into the places they write about. I invite you to view Malacca through the panorama that I have personally tried to portray about my city, Malacca. I have interspersed cameos of notable citizens of the city who have contributed to its development. Interesting snippets about my family and myself have been inserted in relevant chapters of the book. I have added some tables of statistics about people and places culled from my daily visits to the Internet. You will get an insight into how a new Malacca has arisen over the ancient town of the days of the Portuguese, the Dutch, and the British. The new commercial heart of the town, Melaka Raya, and the adjoining malls of Dataran Pahlawan and Mahkota Parade are just a stone's throw from the A Famosa Gateway. You will get an account of the stalled Gateway Island project, said to cost 40 billion ringgit, a small version of Dubai's dazzling reclaimed island development. Napoleon is said to have derided Britain as a nation of shopkeepers. I will describe Malacca today as a city of hotels. This is not an overstatement, and my book will show you why.

Sporadic Memories is a novel about a lifestyle that needs to be read about. Within the first few pages you will realize there has been a loss, it is not sad though; the narrator expresses with great enthusiasm the life they lived, which makes it nice during the times when it becomes difficult to read. By the first few pages I hope you can hear the narrator has been alive for a long time, explaining the way it is written? There is no distinction between the characters' genders, which offers a personal experience for the reader. The part that remembers the time they gave bracelets to each other brings about another way of joining together in marriage ... following how their courtship developed, and the apple tree that is depicted throughout the novel using its fruit in traditional family recipes. It gets sad for a bit after this, but notice that it gets sad because there is so much more to why the one lost is worth writing about. It is partly a love story. You know for sure it is when you get to the parts about the piano played and songs written ... you should at first read to the first song. The memory at the exhibition and recalling times in the rain and snow are next. They traveled a lot together and you will read of a place if you read a little past the description of the surroundings of their home. If you read to the first birthday mentioned; you will find a recipe worth trying, a poem worth reading, and fireworks. The narrator is a playwright, so there is a play that is broken down throughout the novel ... it is a difficult read, but it is important in showing how the two brought their work together, and what positive influences they made upon those they met. Things are repeated to show how important positive repetition is, which helps to move past pain while remembering the passion. This novel is full of passion, carried throughout the life they had for each other, their work, and their friends ... you might want to read through first until you hear about their friends. This novel completes the story as the pages turn; putting certain pages together will bring the memories in order. It is an easy read. It is written poetically, which gives it justice. It begins the way it ends ... Sporadic Memories is a novel about a lifestyle that needs to be read about.

With New York Times bestselling author and Pulitzer Prize finalist Pete Earley, and including chapters by her sister—award-winning actress Glenn Close—Jessie Close shares her story of living with severe bipolar disorder and her tumultuous journey to find the emotional fortitude to bring herself back from the edge. At a young age, Jessie Close struggled with symptoms that would transform into severe bipolar disorder in her early twenties, but she was not properly diagnosed until the age of fifty. Jessie and her three siblings, including actress Glenn Close, spent many years in the Moral Re-Armament cult. Jessie passed her childhood in New York, Switzerland, Connecticut, Zaire (now the Democratic Republic of Congo), and finally Los Angeles, where her life quickly became unmanageable. She was just fifteen years old. Jessie's emerging mental illness led her into a life of addictions, five failed marriages, and to the brink of suicide. She fought to raise her children despite her ever worsening mental conditions and under the strain of damaged romantic relationships. Her sister Glenn and certain members of their family tried to be supportive throughout the ups and downs, and Glenn's vignettes in Resilience provide an alternate perspective on Jessie's life as it began to spiral out of control. Jessie was devastated to discover that mental illness was passed on to her son Calen, but getting him help at long last helped Jessie to heal as well. Eleven years later, Jessie is a productive member of society and a supportive daughter, mother, sister, and grandmother. In Resilience, Jessie dives into the dark and dangerous shadows of mental illness without shying away from its horror and turmoil.

During the Holocaust's long nights there were gentiles in every corner of Europe who saved Jews. This is their story.

"A smart and unusual romance just about right for fans of John Green." —Booklist Liana's decided to boycott kissing this summer, hoping to lose her reputation and focus on planetary science. Hank has near-encyclopedic knowledge of music and Asperger's syndrome. When they meet by chance in a hospital restroom, neither one realizes that their friendship will change everything. If Liana's experiment goes as planned, she'll learn to open up, using her mouth for talking instead of kissing. But Hank's never been kissed and thinks Liana might be the one to show him . . . if he can stop spewing music trivia long enough to let her.

One of art's purest challenges is to translate a human being into words. The New Yorker has met this challenge more successfully and more originally than any other modern American journal. It has indelibly shaped the genre known as the Profile. Starting with light-fantastic evocations of glamorous and idiosyncratic figures of the twenties and thirties, such as Henry Luce and Isadora Duncan, and continuing to the present, with complex pictures of such contemporaries as Mikhail Baryshnikov and Richard Pryor, this collection of New Yorker Profiles presents readers with a portrait gallery of some of the most prominent figures of the twentieth century. These Profiles are literary-journalistic investigations into character and accomplishment, motive and madness, beauty and ugliness, and are unrivalled in their range, their variety of style, and their embrace of humanity. Including these twenty-eight profiles: "Mr. Hunter's Grave" by Joseph Mitchell "Secrets of the Magus" by Mark Singer "Isadora" by Janet Flanner "The Soloist" by Joan Acocella "Time . . . Fortune . . . Life . . . Luce" by Walcott Gibbs "Nobody Better, Better Than Nobody" by Ian Frazier "The Mountains of Pi" by Richard Preston "Covering the Cops" by Calvin Trillin "Travels in Georgia" by John McPhee "The Man Who Walks on Air" by Calvin Tomkins "A House on Gramercy Park" by Geoffrey Hellman "How Do You Like It Now, Gentlemen?" by Lillian Ross "The Education of a Prince" by Alva Johnston "White Like Me" by Henry Louis Gates, Jr. "Wunderkind" by A. J. Don't waste your time with health and diet Web sites that don't work The Internet provides unlimited resources that make it easy to learn about various diets, weight-loss programs, and weight-reduction procedures. But with so many sources, which ones can you trust for information that's safe, accurate, and up-to-date? The Internet Guide to Medical Diets and Nutrition saves you time, trouble, and effort in your search for Web sites that offer the facts about diet programs and nutrition philosophies that meet your health, medical, or religious needs. The Internet Guide to Medical Diets and Nutrition helps you filter out Web sites that offer little, if any, real help in maintaining special diets that address specific diseases (low protein, high calcium, low gluten, hypoallergenic, diabetes, cancer, anemia, etc.), religious or philosophical mandates (Hindu, kosher, vegan, Muslim, macrobiotic, etc.), or commercial regimens (Atkins™, Weight Watchers®, NutriSystem®, etc.), or provide answers to questions about bariatric surgery (gastric bypass, stomach stapling, etc.). This invaluable reference resource teaches you how locate Web sites recommended to you, how to evaluate the information you find there, how to research a particular diet or health concern, how to choose and use the right search engine, the significance of domains in Web addresses, and how to observe proper etiquette when participating in Internet discussion groups. Topics examined in the Internet Guide to Medical Diets and Nutrition include: general diet and nutrition Web sites Web calculators (Body Mass Index, exercise, calories, weight-maintenance, healthy weight) the nutrient content of foods food labels non-surgical weight-loss Web sites caloric restrictions hypnosis weight-loss centers and workshops weight-loss surgery Web sites Web sites for specific medical conditions vegetarianism recipes online discussion groups and much more! The Internet Guide to Medical Diets and Nutrition also includes a glossary of terms and screen captures of important Web sites. The book is a must-have as an everyday resource for consumers with diet and health interests and concerns, and as a reference tool for medical and public libraries.

America's perceptions about the inevitable effects of aging are about to be completely rethought, thanks to groundbreaking new information from an internationally known expert on hormones and antiaging medicine. Thierry Hertoghe, M.D., has an important message to share: people are aging unnecessarily. Based on thirty-five years of scientific studies, *The Hormone Solution: Stay Younger Longer with Natural Hormone and Nutrition Therapies* is the first book that offers a prescriptive program to counter memory loss, weight gain, wrinkles, shrinking muscle mass, impotence, hair loss, and a host of other signs and symptoms of aging. Dr. Hertoghe offers an effective program of hormone replacement therapy using safe, low doses of natural hormones—in conjunction with a healthy diet and vitamin and mineral supplements—to help people maintain physical, mental, and emotional health and literally restore their bodies to a state that's three to twelve years younger than their actual age. He identifies the fifteen main, crucial hormones found in the body and explains the process that restores each one to its correct level. With a foreword by renowned doctor Barry Sears, *The Hormone Solution* is filled with self-scoring checklists, eating plans, nutritional prescription plans, and hormone shopping lists that help every reader calculate his or her personal hormone profile. Dr. Hertoghe is revolutionizing the medical field with his work, showing us how to treat chronic illnesses and the large and small aspects of aging by using preventive measures to drastically slow the aging process and its effects without costly procedures and surgeries. *The Hormone Solution* is a landmark publication that will revolutionize how people age, enabling us to live longer, healthier, and happier lives

From New York Times bestselling author Pete Earley—the strange but true story of how a young man's devastating brain injury gave him the unique ability to connect with the world's most terrifying criminals. Fifteen-year-old Tony Ciaglia had everything a teenager could want until he suffered a horrific head injury at summer camp. When he emerged from a coma, his right side was paralyzed, he had to relearn how to walk and talk, and he needed countless pills to control his emotions. Abandoned and shunned by his friends, he began writing to serial killers on a whim and discovered that the same traumatic brain injury that made him an outcast to his peers now enabled him to connect emotionally with notorious murderers. Soon many of America's most dangerous psychopaths were revealing to him heinous details about their crimes—even those they'd never been convicted of. Tony despaired as he found himself inescapably drawn into their violent worlds of murder, rape, and torture—until he found a way to use his gift. Asked by investigators from the National Center for Missing and Exploited Children to aid in solving a murder, Tony launched his own searches for forgotten victims with clues provided by the killers themselves. *The Serial Killer Whisperer* takes readers into the minds of murderers like never before, but it also tells the inspiring tale of a struggling American family and a tormented young man who found healing and closure in the most unlikely way—by connecting with monsters.

Children's books seek to assist children to understand themselves and their world. *Unsettling Narratives: Postcolonial Readings of Children's Literature* demonstrates how settler-society texts position child readers as citizens of postcolonial nations, how they represent the colonial past to modern readers, what they propose about race relations, and how they conceptualize systems of power and government. Clare Bradford focuses on texts produced since 1980 in Canada, the United States, Australia, and New Zealand and

includes picture books, novels, and films by Indigenous and non-Indigenous publishers and producers. From extensive readings, the author focuses on key works to produce a thorough analysis rather than a survey. *Unsettling Narratives* opens up an area of scholarship and discussion—the use of postcolonial theories—relatively new to the field of children’s literature and demonstrates that many texts recycle the colonial discourses naturalized within mainstream cultures.

All the information ever needed to extract dyestuffs from common trees, flowers, lichens, and weeds to create beautifully dyed materials. The heart of the book is 52 recipes for dyes made from natural, easily obtained dyestuffs.

The primary function of this book is to serve as a guide to the selection of books for children, recognizing the vast range of books published and the individual rates of reading and social development of different children.

Beginning with general international Web sites the guide is then organized by continent, then by specific country. Sites are divided into five categories within each country - general information, economy, business and trade, business travel and contact information.

Each passing year bears witness to the development of ever more powerful computers, increasingly fast and cheap storage media, and even higher bandwidth data connections. This makes it easy to believe that we can now – at least in principle – solve any problem we are faced with so long as we only have enough data. Yet this is not the case. Although large databases allow us to retrieve many different single pieces of information and to compute simple aggregations, general patterns and regularities often go undetected. Furthermore, it is exactly these patterns, regularities and trends that are often most valuable. To avoid the danger of “drowning in information, but starving for knowledge” the branch of research known as data analysis has emerged, and a considerable number of methods and software tools have been developed. However, it is not these tools alone but the intelligent application of human intuition in combination with computational power, of sound background knowledge with computer-aided modeling, and of critical reflection with convenient automatic model construction, that results in successful intelligent data analysis projects. *Guide to Intelligent Data Analysis* provides a hands-on instructional approach to many basic data analysis techniques, and explains how these are used to solve data analysis problems. Topics and features: guides the reader through the process of data analysis, following the interdependent steps of project understanding, data understanding, data preparation, modeling, and deployment and monitoring; equips the reader with the necessary information in order to obtain hands-on experience of the topics under discussion; provides a review of the basics of classical statistics that support and justify many data analysis methods, and a glossary of statistical terms; includes numerous examples using R and KNIME, together with appendices introducing the open source software; integrates illustrations and case-study-style examples to support pedagogical exposition. This practical and systematic textbook/reference for graduate and advanced undergraduate students is also essential reading for all professionals who face data analysis problems. Moreover, it is a book to be used following one’s exploration of it. Dr. Michael R. Berthold is Nycomed-Professor of Bioinformatics and Information Mining at the University of Konstanz, Germany. Dr. Christian Borgelt is Principal Researcher at the Intelligent Data Analysis and Graphical Models Research Unit of the European Centre for Soft Computing, Spain. Dr. Frank Höppner is Professor of Information Systems at Ostfalia University of Applied Sciences, Germany. Dr. Frank Klawonn is a Professor in the Department of Computer Science and Head of the Data Analysis and Pattern Recognition Laboratory at Ostfalia University of Applied Sciences, Germany.
