From Hogwarts to Hogsmeade, Diagon Alley, and the Ministry of Magic, each paper scene is laser die-cut for precision and gorgeously detailed. Every scene is accompanied by essential information about these magical places and fun, behind-the-scenes facts from the films. Designed to thrill both seasoned Harry Potter fans and younger children, this volume is a treasured keepsake for the whole family.

A gripping literary thriller and smash bestseller that has taken Italy, France, Germany and the UK by storm. Six severed arms are discovered, arranged in a mysterious circle and buried in a clearing in the woods. Five of them appear to belong to missing girls between the ages of eight and eighteen. The sixth is yet to be identified. Worse still, the girls' bodies, alive or dead, are nowhere to be found. Lead investigators Mila Vasquez, a celebrated profiler, and Goran Gavila, an eerily prescient criminologist, dive into the case. They're confident they've got the right suspect in their sights until they discover no link between him and any of the kidnappings except the first. The evidence in the case of the second missing child points in a vastly different direction, creating more questions than it answers. Vasquez and Gavila begin to wonder if they've been brought in to take the fall in a near-hopeless case. Is it all coincidence? Or is a copycat criminal at work? Obsessed with a case that becomes more tangled and intense as they unravel the layers of evil, Gavila and Vasquez find that their lives are increasingly in each other's hands. *THE WHISPERER*, as sensational a bestseller in Europe as the Stieg Larsson novels, is that rare creation: a thought-provoking, intelligent thriller that is also utterly unputdownable.

The third book in the internationally bestselling series that includes *The Breadwinner*, *Parvana's Journey* and *My Name Is Parvana*. Parvana's best friend, Shauzia, has escaped the misery of her life in Kabul, only to end up in a refugee camp in Pakistan. But she still dreams of seeing the ocean and eventually making a new life in France. This is the dream that has sustained her through the terrible years in Kabul. It is the dream for which she has forsaken family and friends. But it is hard to imagine herself in a field of purple lavender when she is living in the Widows' Compound of a muddy, crowded refugee camp outside Peshawar. Even worse, the compound is run by Mrs. Weera, Shauzia's bossy phys ed teacher from Kabul, who insists that Shauzia be useful and make the best of a dismal situation. Shauzia finally decides to leave the camp and try her luck on the streets. She is determined to earn money to buy her passage out of the country. Peshawar is dangerous and full of desperately poor and wandering children like herself, but she has Jasper, the dog who followed her down from a shepherds' camp in the mountains. And she knows how to masquerade as a boy and comb the streets for jobs. She figures she knows how to survive. But life as a street kid is dangerous and terrifying, and even with the advantages of a strong will, brave spirit and good luck, Shauzia soon discovers that the old choices are not so easy any more. This is a powerful and very human story of a feisty, driven girl who tries to take control of her own life. The reissue includes a new cover and map, and an updated author's note and glossary to provide young readers with background and context. Royalties from the sale of this book will go to Street Kids International.

Introducing Montessori-inspired early childhood activity books! This book--with eight pages of stickers--does more than simply stimulate learning through play: it enhances the cognitive development of the child. The activities become progressively more complex according to the three stages of a child's learning: getting to know the material through sensory experience, recognizing the material, and being able to explain the material. Squares and circles, triangles and rectangles: the world is full of shapes and this entertaining book teaches preschoolers to recognize each one.

Tons of /a New Photos! Bad Decisions! WTF Moments! Plus Fan Stories! Celebrities! Goats! As Americans, we hold these truths to be self-evident: We will shop. Mai come ieri è un romanzo ambientato a Corvegna, un piccolo paese immaginario della provincia di Torino. La vicenda viene narrata attraverso il racconto in prima persona di Michele Revelli, giornalista e scrittore cresciuto a Corvegna, di ritorno al paese natale dopo alcune vicissitudini personali che hanno portato alla separazione dalla moglie e a difficoltà professionali. Attraverso il suo punto di vista veniamo a conoscenza della sparizione di 4 persone di Corvegna: 3 adolescenti e il parroco del paese. Michele si troverà coinvolto nel difficile compito di fare chiarezza circa la dinamica degli eventi che hanno portato alla scomparsa, nonché alla ricerca di informazioni utili al ritrovamento delle persone sparite. Il suo racconto al presente viene intervallato dalla prospettiva in terza persona di altre persone le cui vicende si intersecano nel racconto: la figlia Marta, coetanea dei ragazzi spariti; l'ispettore Achille Lopresti, amico di infanzia di Michele; Junior Ahmendi, fratello di uno dei ragazzi scomparsi. Tra intrecci a cambi di prospettiva, le vicende volgono rapidamente al termine nell'arco di tre giorni, in un finale carico di tragicità e redenzione.

Space Atlas combines updated maps, lavish photographs, and elegant illustrations to chart the solar system, the universe, and beyond. For space enthusiasts, science lovers, and star gazers, here is the newly revised edition of National Geographic's enduring guide to space, with a new introduction by American hero Buzz Aldrin. In this guided tour of our planetary neighborhood, the Milky Way and other galaxies, and beyond, detailed maps and fascinating imagery from recent space missions partner with clear, authoritative scientific information. Starting with the sun and moving outward into space, acclaimed science writer and physicist James Trefil illuminates each planet, the most important moons, significant asteroids, and other objects in our solar system. Looking beyond, he explains what we know about the Milky Way and other galaxies--and how we know it, with clear explanations of the basics of astrophysics, including dark matter and gravitational waves. For this new edition, and to celebrate the 50th anniversary of his moonwalk, astronaut and American hero Buzz Aldrin offers a new special section on Earth's moon and its

essential role in space exploration past and future.

Astrophysics is often –with some justification – regarded as incomprehensible without the use of higher mathematics.

Consequently, many amateur astronomers miss out on some of the most fascinating aspects of the subject. *Astrophysics Is Easy!* cuts through the difficult mathematics and explains the basics of astrophysics in accessible terms. Using nothing more than plain arithmetic and simple examples, the workings of the universe are outlined in a straightforward yet detailed and easy-to-grasp manner. The original edition of the book was written over eight years ago, and in that time, advances in observational astronomy have led to new and significant changes to the theories of astrophysics. The new theories will be reflected in both the new and expanded chapters. A unique aspect of this book is that, for each topic under discussion, an observing list is included so that observers can actually see for themselves the concepts presented –stars of the spectral sequence, nebulae, galaxies, even black holes. The observing list has been revised and brought up-to-date in the Second Edition.

Neil deGrasse Tyson's #1 New York Times best-selling guide to the cosmos, adapted for young readers. From the basics of physics to big questions about the nature of space and time, celebrated astrophysicist and science communicator Neil deGrasse Tyson breaks down the mysteries of the cosmos into bite-sized pieces. *Astrophysics for Young People in a Hurry* describes the fundamental rules and unknowns of our universe clearly—and with Tyson's characteristic wit, there's a lot of fun thrown in, too. This adaptation by Gregory Mone includes full-color photos, infographics, and extra explanations to make even the trickiest concepts accessible. Building on the wonder inspired by outer space, *Astrophysics for Young People in a Hurry* introduces an exciting field and the principles of scientific inquiry to young readers.

A bordo del Gypsy Steamboat, il battello che attraversa il Bosforo danzando come uno zingaro, una scrittrice incontra lo sguardo della donna che le siede accanto: giovane ma con il viso segnato, due bambini chiassosi a cui badare e un terzo che cresce dentro di lei. Una madre: tutto quello che la scrittrice non sarà mai. O almeno così crede. Perché anche a Elif Shafak, autrice di romanzi tradotti in tutto il mondo, toccherà l'esperienza più emozionante e complicata che una donna possa affrontare: la maternità. In questo libro sincero e bruciante, Elif ci accompagna in un viaggio pieno di storie, poesia e colori, dentro le emozioni contrastanti che l'hanno attraversata dopo la nascita della sua bambina. Nel tentativo di conciliare le tante versioni di sé che la abitano: il "piccolo harem" che è in ogni donna. Con la grazia di sempre, e il suo straordinario gusto per la narrazione, Shafak ci conduce nel luogo magico in cui maternità e letteratura si incontrano, regalandoci una storia sofferta eppure luminosa, scritta con "latte nero e inchiostro bianco".

Press the pages of this enchantingly illustrated book to hear the farmyard world come to life. Little children will love discovering the animals and all the other things making noises on the busy farm; there's a noisy tractor, a crowing cockerel, buzzing bees, a mooing cow, cheeping chicks and more. Also includes lots of die-cuts and peep-holes alongside the sounds, creating a multi-sensory, interactive activity. Provides a great introduction to farmyard animals with plenty of items to look and spot for eager eyes and little fingers.

Provides facts about the solar system, space exploration, and the creation of the universe, and answers such questions as "Are we alone in the universe?"

Ogni anno quasi diecimila container trasportativa nave si perdono in mare. Nella maggior parte dei casi questi "naufragi" non destano alcun clamore, avvengono nella più totale indifferenza di media e opinione pubblica. Ma cosa accade quando 28.800 giocattoli di gomma destinati a sguazzare placidamente in una vasca da bagno – paperelle, tartarughe, rane, marmotte – perdono la rotta per Tacoma (Washington) e scompaiono nel nulla? Una volta appresa la notizia, lo scrittore americano Donovan Hohn ha raccolto la sfida e si è messo sulle tracce dei giocattoli in fuga. Moby Duck non è soltanto uno spericolato viaggio che consente a Hohn di spingersi fino agli angoli più remoti dell'Alaska, ma è anche un pretesto per approfondire alcuni risvolti culturali, economici e sociali che questa curiosa storia porta con sé. Perché le papere giocattolo sono gialle? Quali interessi economici si nascondono dietro a questo mercato? Cosa accade alle navi merci quando sono in alto mare? Quale rotta potrebbe aver seguito il carico scomparso? È possibile stimare il danno ambientale causato da questa enorme flotta di plastica? Un romanzo filosofico, un saggio ambientalista, un reportage spassoso dove i pensieri e il vissuto dell'autore partecipano attivamente alla costruzione di una storia che ha fatto il giro del mondo.

In this book from the critically acclaimed Little People, BIG DREAMS series, discover the life of Anne Frank, the writer whose diary captured the hearts of the public. Anne Frank was born in Germany to a loving family. But when World War II broke out, Anne and her family had to hide in a secret annex in Amsterdam.
