From the dawn of European civilization to the twentieth century, the automaton—better known today as the robot—has captured the Western imagination and provided a vital lens into the nature of humanity. Historian Minsoo Kang argues that to properly understand the human-as-machine and the human-as-fundamentally-different-from-machine, we must trace the origins of these ideas and examine how they were transformed by intellectual, cultural, and artistic appearances of the automaton throughout the history of the West. Kang tracks the first appearance of the automaton in ancient myths through the medieval and Renaissance periods, marks the proliferation of the automaton as a central intellectual concept in the Scientific Revolution and the subsequent backlash during the Enlightenment, and details appearances in Romantic literature and the introduction of the living machine in the Industrial Age. He concludes with a reflection on the destructive confrontation between humanity and machinery in the modern era and the reverberations of the humanity-machinery theme today. *Sublime Dreams of Living Machines* is an ambitious historical exploration and, at heart, an attempt to fully elucidate the rich and varied ways we have utilized our most uncanny creations to explore essential questions about ourselves.

Over the course of thirteen long days, twelve assorted passengers, three rafting guides and one stray dog will navigate the rapids of the Colorado River through the Grand Canyon together. From their early-morning rise on the shore of the river to the adrenaline rush of paddling through Lava Falls, they will soon come to know each other more intimately than they could have expected.

Tempers will flare and decisions will be second-guessed . . . and ultimately all of them, from an unhappy teenager to an aging river guide, will realize that sometimes the most daunting adventures have nothing to do with white-water rapids, and everything to do with reconfiguring the rocky canyons of the heart.

Mature Content. ***Not Intended For Readers Under The Age Of 17*** A Bet... Yes, I made a bet with my best friend-my now ex-best friend. It had been a stupid, heat of the moment kind of thing. I'd just wanted to get her out of my system and move on. Instead I've lived to regret it ever since. I lost the girl I loved, a girl that possessed my very soul. Now I can't even get close to Natalie. She thinks all she ever meant to me was just the means to the end of a stupid, stupid game. ...For a Bet! In the span of one night I'd gone from thinking I had a future with the man I loved to SHATTERED at his feet. I can't get over it. The pain is too strong, too destructive as it festers more and more inside of me. And then my friend came up with the perfect revenge for both our broken hearts. "I bet you..." Those three little words gave me a reason to ball my pain up and throw it back in Devlin Cutter's face. I would let him back in, let him think he had a chance with me once again. And then I would walk away, leaving him broken and

bleeding at my feet as he once had left me. This time he would be the one SHATTERED.

Drawing upon insights from the natural and social sciences, this book puts forth a provocative new argument that the violent Islamist threat in Indonesia today derives its stubborn resilience from being in essence a complex, adaptive and self-organizing system – or what some specialists might even call a super-organism. The book challenges the popular assumption that ideology is the root cause that explains why Indonesian Islamists radicalize into violent extremism. In addition it addresses why despite years of intense security force pressure, seemingly disparate militant cells keep ‘popping up’ like the proverbial hydra - and in the apparent absence of a centralized coordinating body, nevertheless appear to display an organic interconnectivity with one another. Going beyond standard ideological mantras the book argues that fresh inter-disciplinary thinking is needed to cope with the constantly mutating violent Islamist challenge in Indonesia, and puts forth a comprehensive strategy for doing so. It will be of interest to academics and students of terrorism, religion and violence in the Southeast Asian region.

A decade ago, Walter Brueggemann called the church to journey together for the good of our community through neighborliness, covenanting, and reconstruction. He distilled this challenge to its most basic issues: Where is the church going? What is its role in contemporary society? What lessons does it have to offer a world enmeshed in turbulent times? Published originally in 2010, *Journey to the Common Good* spoke to an era defined in large part by America's efforts to rebuild from an age of terror as it navigated its way through an economic collapse. Today, the dual crises of the coronavirus and the disease of racial injustice present daunting new challenges for the church as it seeks the good of its neighbors. In a new introduction to this updated edition, Brueggemann links the wilderness tradition of Exodus to these current crises, as a framework to help the church navigate this time of risk and vulnerability and to pursue a genuine social alternative to the governance of Pharaoh. The answer to the question of the church's role in society is the same answer God gave to the Israelites thousands of years ago: love your neighbor and work for the common good.

Recent Thoreau studies have shifted to an emphasis on the green" Thoreau, on Thoreau the environmentalist, rooted firmly in particular places and interacting with particular objects. In the wake of Buell's *Environmental Imagination*, the nineteen essayists in this challenging volume address the central questions in Thoreau studies today: how “green,” how immersed in a sense of place, was Thoreau really, and how has this sense of place affected the tradition of nature writing in America? The contributors to this stimulating collection address the ways in which Thoreau and his successors attempt to cope with the basic epistemological split between perceiver and place inherent in writing about nature; related discussions involve the kinds of discourse most effective for writing about place. They focus on the impact on Thoreau and his successors of culturally constructed assumptions deriving from science, politics, race, gender, history, and literary conventions. Finally, they explore the implications surrounding a writer's appropriation or even exploitation of places and objects.

It also looks at halon production, consumption and phase-out strategies in countries with economies in transition and article 5 (1) countries such as China and India.

A conspicuous feature of the modern economy is the multitude of multiunit systems that operate in several markets - an organizational form that arguably rivals the M-form as the 20th century's most successful. Research traditions studying multiunit systems include the multimarket perspective, which has used commitment and mutual forbearance theory, and the multiunit perspective, which has used learning and knowledge transfer theory. These perspectives are interdisciplinary, but to date there has been little direct interaction among them. This text aims to bring these areas together, discussing such things as: examining how variation in firm capabilities affects the co-ordination of branches and thus their forbearance or transfer of routines; bridging theories of market conduct and internal behaviour to explore how knowledge about markets and competitor behaviour is transferred among organizational units; making a theory of contingent multiunit or single-unit competitive advantage that can account for the coexistence of these organizational forms in many markets; and examining the effects of firm contacts in alliances or technological fields on their competitive behaviours.

An examination of how the availability of low-end information and communication technology has provided a basis for the emergence of a working-class network society in China. The idea of the “digital divide,” the great social division between information haves and have-nots, has dominated policy debates and scholarly analysis since the 1990s. In *Working-Class Network Society*, Jack Linchuan Qiu describes a more complex social and technological reality in a newly mobile, urbanizing China. Qiu argues that as inexpensive Internet and mobile phone services become available and are closely integrated with the everyday work and life of low-income communities, they provide a critical seedbed for the emergence of a new working class of “network labor” crucial to China's economic boom. Between the haves and have-nots, writes Qiu, are the information “have-less”: migrants, laid-off workers, micro-entrepreneurs, retirees, youth, and others, increasingly connected by cybercafés, prepaid service, and used mobile phones. A process of class formation has begun that has important implications for working-class network society in China and beyond. Qiu brings class back into the scholarly discussion, not as a secondary factor but as an essential dimension in our understanding of communication technology as it is shaped in the vast, industrializing society of China. Basing his analysis on his more than five years of empirical research conducted in twenty cities, Qiu examines technology and class, networked connectivity and public policy, in the context of massive urban reforms that affect the new working class disproportionately. The transformation of Chinese society, writes Qiu, is emblematic of the new technosocial reality emerging in much of the Global South.

Some scholars in the history of ideas have had a growing interest in examining Leibniz's many discussions of various aspects of religion,

Christian, Jewish and far eastern. Leibniz, with his voracious interest and concern for so many aspects of human intellectual and spiritual life, read a wide variety of books on the various religions of mankind. He also was in personal contact with many of those who espoused orthodox and non-orthodox views. He annotated his copies of many books on religious subjects. And he was working on schemes for reuniting the various Catholic and Protestant churches in Europe. Studies on Leibniz's views on Judaism, on the Kabbalah, on Chinese thought have been appearing over the last decades. It was decided by some of us that since there has been a growing interest in this side of Leibniz's thought it would be a good idea to bring together a group of scholars working on different aspects of Leibniz's views on religion, mysticism and spiritualism, in order to have them present papers on their current researches, and to have the opportunity for lengthy discussion, formal and informal, in the most pleasant academic ambiance of the William Andrews Clark Library in Los Angeles. Under the sponsorship of the UCLA Center for Seventeenth and Eighteenth Century Studies, a workshop conference was held November 18-19, 1994.

Praise for Catherine Alliott "Possibly my favorite writer."-Marian Keyes "Compulsively readable and highly entertaining."-Times "A joy...you're in for a treat."-Daily Express "Hilarious and full of surprises."-Daily Telegraph 'Til death do us part jut might cause you to wring someone's neck... Imogen Cameron can't quite figure out how she and her husband, Alex, have plummeted from living in their beloved London townhouse to scraping by in his exgirlfriend's guest cottage. But although the scenic pastures might inspire her flagging artistic career, and getting out of the city might do their son good, Imogen wonders if all the country air in the world could calm the crowds that are invading her marriage. There's a gaggle of psychotic chickens, an infuriatingly bossy vet, that oh-so-sweet ex-girlfriend-and the feeling that her husband is preoccupied with more than just his job. International bestselling author Catherine Alliott delivers an "intelligent, acutely drawn picture of a difficult marriage" (Daily Telegraph), crafting a witty, sophisticated, and poignant exploration of relationships and family.

Robust and reliable measures of consumer expenditures are essential for analyzing aggregate economic activity and for measuring differences in household circumstances. Many countries, including the United States, are embarking on ambitious projects to redesign surveys of consumer expenditures, with the goal of better capturing economic heterogeneity. This is an appropriate time to examine the way consumer expenditures are currently measured, and the challenges and opportunities that alternative approaches might present. Improving the Measurement of Consumer Expenditures begins with a comprehensive review of current methodologies for collecting consumer expenditure data. Subsequent chapters highlight the range of different objectives that expenditure surveys may satisfy, compare the data

available from consumer expenditure surveys with that available from other sources, and describe how the United States's current survey practices compare with those in other nations.

In the last several years, Walter Brueggemann's writings have directly addressed the situation of Christian communities in today's globalized context, with its consumerist lifestyles, vast inequalities, and near-imperial exercises of power. His insights, forged in rugged encounters with the texts of the Old Testament, are sharp, painful, and indispensable. In the people Israel Brueggemann finds a model of an alternative community - anchored in YHWH, ever exploring new possibilities, and prophetically bent against empire. Part I: The Word Redescribing the World Part II: The Word Redefining the Possible Part III: The Word Shaping a Community of Discipleship
