"I enthusiastically endorse Patrick Marsolek's Self-hypnosis Manual. This is more than a 'how-to' manual. After an orientation to hypnosis, trance, the subconscious, and other relevant subjects, Patrick guides his readers in finding self-hypnosis techniques that work for them. Instead of simply teaching a number of self-hypnosis techniques (like most self-hypnosis manuals), it empowers the learner with an understanding of the induction process and the creation of individualized protocols. Furthermore, the Manual guides the reader through creating specific auto-suggestions to maximize therapeutic results. The Manual also is exceptional in the way that it addresses fears and other hindrances to trance (e.g., beliefs and expectations), stresses the normalness and benefits of self-induced trance, provides helpful application techniques (e.g., dealing with pain), discusses each induction technique, and promotes personal confidence in the process. In sum, Patrick gives the requisite understanding and tools to be one's own best self-hypnosis guide." - Whitney Hibbard Ph.d., Author of "Forensic Hypnosis"

The most comprehensive NLP Practitioner course manual ever written. A fully revised and updated edition, it contains the very latest in Neuro-Linguistic Programming, particularly with regard to the Meta-states model and the Meta-model of language. For all those embarking on Practitioner training or wishing to study at home, this book is your essential companion. Written and designed by two of the most important theorists in NLP today.

Training Trances is about how to therapeutically communicate with the unconscious mind. The authors present their own unique integration of Ericksonian techniques, traditional models of hypnotherapy, and recent research in related areas. Numerous new patterns modeled from the work of Milton H. Erickson, M.D. are clearly explained and demonstrated. The use of trance in training design, to unconsciously install the skills being taught to the participants, is also covered. The book developed from transcripts of a four day workshop, and the design of the book parallels the design chosen for the training itself. Individual exercises or those done in groups of two or three are offered so that the reader may practice the techniques and learn the skills. There are numerous "live" demonstrations, inductions, and double inductions which create for the reader a real "feel" of how hypnosis is done and which are also a rich source for linguistic analysis for the advanced reader. Written with insight and humor, this book's most unique twist is its use of multi-level communication and hypnotic language to create a "training trance" for the readers as they journey through the text. Some hypnotic references are obvious and explicit -- those which are not obvious will create enjoyable "ah-ha!" experiences for the reader as they are discovered.

and kink? A clear, step by step guide that explains theory as well as practice so that you can develop your own style and flair? Authors James Gordon, a clinical hypnotherapist, and Rebecca Doll, who holds a master's in education, wrote an exhaustive guide. We focus on teaching fundamentals so that you can develop your own unique style and flair. Other books are designed to give you a few scripts and tricks, but they are not an entire course in hypnosis. We reveal all the keys that will allow the reader a complete understanding of how to hypnotize. Among many topics we cover: ethics and consent, types of suggestibility, suggestibility testing, hypnotic modalities, inductions, deepening techniques. Designed to be an inclusive course, we offer roadmap of how to recover if you have a problem, and what to do if you experience abreaactions or other issues in hypnosis, discussing important issues such as emotional support and aftercare. We tell you the things that are vital to your knowledge and understanding of how to successfully hypnotize even those subjects that have previously proven difficult or impossible to hypnotize. If you've been looking for a respectable source for training in erotic hypnosis with a full and up front discussion of both the easy and hard parts, this book is an excellent guide. Now widely regarded as the world's greatest hypnotist, Richard Bandler observed and developed patterns which became the foundation of neuro-linguistic programming (NLP), arguably one of the most profoundly effective approaches for self-development and change. Since coauthoring the internationally influential books, The Structure of Magic Volume 1, and Patterns of the Hypnotic Techniques of Milton Erickson, M.D.

Volume 1, Bandler has traveled the world, honing his skills and helping people solve problems and achieve goals when other "experts" have been unable to help. Richard Bandler's Guide to TRANCE-formation, he returns to his roots: hypnotic phenomena, trancework, and altered states to provide a highly compelling prescription for personal change. According to Bandler, "trance" is at the very foundation of human experience. People are not simply in or out of trance, but are moving from one trance to another. They have their work trances, their relationship trances, their driving trances, and their parenting trances. Some of these states are useful and appropriate; others are not. With his signature wit and contrarian approach to therapy, Bandler shows how anyone can reset or reprogram problem behaviors to desired alternatives, with lasting and life-altering results. Peppered with case studies and more than thirty exercises, Richard Bandler's Guide to TRANCE-formation, is an intriguing, engaging, and often amusing, read for anyone, whether they are new to NLP, want to further their NLP training, or simply want to make a positive difference in their own lives. On 18th May 1992 the friends had achieved a state of awareness for spirit to talk to them, Peter stood up for the first time. "This book by Carson, Marion, and Overdurf is an excellent exploration of the extraordinary trance process of deep trance identification. It is thorough, practical, and clear thereby providing an excellent guide for those seeking far-reaching transformational change. I highly recommend it" Stephen Gilligan Ph.D Generative Trance. Deep Trance Identification (DTI) has captivated the imagination of hypnotists since the mid 20th century. DTI has been used by countless modelers to master hypnosis skills, musical and acting abilities, emotional transformation, and so much more. Historically very little is written about DTI despite it being at the heart of all unconscious learning and transformation. For the first time DTI is presented here in a practical and easily understandable way. Shawn Carson, Jess Marion, and John Overdurf have dedicated years to studying and using DTI and in this book they share their discoveries. They present the art and neuroscience of this hypnotic phenomenon and explain how you can use this modality to change your life and the lives of your clients. Deep Trance Identification presents an elegant model for using DTI and outlines comprehensive techniques that make the DTI experience deeply transformative.

What would it be like if you could travel back in time to change the past in a way that makes life happier and more fulfilling today? What if your clients could easily let go of the past in ways that leave them deeply transformed and empowered today? Reimprinting allows you to leverage how memory functions on a neurological level to create deep unconscious change. In this book you will discover a unique approach to reimprinting that is highly conversational and fast. Gone are the days of needing to find an "initial sensitizing event" or worrying over the dangers of regression work. The approach presented in this book allows you to positively influence your clients' memories through conversational hypnosis. To the untrained eye it will

look like an engaging conversation while under the surface your clients will break free from disempowering memories. In this book you will discover an in depth explanation and demonstration of this pattern, the 3 times when regression work is indicated, the neuroscience behind reimplenting, and a number of variations on the pattern. Variations include: deep trance reimplenting, Ericksonian regression work, reimplenting through Deep Trance Identification, reimplenting for smoking cessation, and reimplenting through implicit memories.
