For years, sales people have struggled with cliched views of how they sell, while at the same time customers have become more sophisticated and discerning, stopping off at different or unconventional places in the sales funnel. The result is that the technique of sales people controlling the sales conversation and learning how to influence the customer no longer works. *Selling Transformed* introduces the new world of selling, and addresses the reasons why sales people are so poorly perceived. *Selling Transformed* provides fresh, tangible ideas on how to develop better sales practices. Focusing as much on the customers as on the sellers, it explains key theories of selling effectively and introduces four proven strategies that are based on the values customers look for in sales people: authenticity, client-centricity, proactive creativity and being tactfully audacious. Explaining what customers look for in sales people, and advising on how to develop and deliver these values, this is a new type of sales manual guaranteed to improve sales performance.

The heyday of the classic sales force is over.

How to close the gap between strategy and execution Two-thirds of executives say their organizations don't have the capabilities to support their strategy. In *Strategy That Works*, Paul Leinwand and Cesare Mainardi explain why. They identify conventional business practices that unintentionally create a gap between strategy and execution. And they show how some of the best companies in the world consistently leap ahead of their competitors. Based on new research, the authors reveal five practices for connecting strategy and execution used by highly successful enterprises such as IKEA, Natura, Danaher, Haier, and Lego. These companies:

- Commit to what they do best instead of chasing multiple opportunities
- Build their own unique winning capabilities instead of copying others
- Put their culture to work instead of struggling to change it
- Invest where it matters instead of going lean across the board
- Shape the future instead of reacting to it

Packed with tools you can use for building these five practices into your organization and supported by in-depth profiles of companies that are known for making their strategy work, this is your guide for reconnecting strategy to execution.

You may be a senior executive wondering how to engage hundreds or thousands of employees in your vision, strategy or the transformation of the business; or a specialist in HR, communication and change, tasked with the challenge of 'aligning and mobilising' your people. In either case, you no longer want compliant people, you want individuals who will engage their creativity at work. For their part, engaged employees want a say in their work and in how the business changes. The Chief Engagement Officer explores a management philosophy which recognises the value of opening up decision making to the right groups to improve the quality of decisions and change, accelerate execution and broaden ownership. John Smythe asks what the concept of engagement means for employer and employee; tests whether and how it is different from internal communication and provides a practical framework for those who want to engage colleagues but need advice based on applied experience. The book includes a tapestry of reports from organisations who are engaging their employees to drive performance and change. The author demonstrates how powerful models, developed from his work at SmytheDorwardLambert, his time as an organisational fellow with McKinsey and Company, and his consultancy with Engage for Change, can be used to take this process forward in any organisation. The Chief Engagement Officer is a highly readable guide to the revolution that is needed in employee communication and organisational leadership from one of the most experienced and well-regarded experts on employee communication.

You think you have a winning strategy. But do you?

Executives are bombarded with bestselling ideas and best practices for achieving competitive advantage, but many of

these ideas and practices contradict each other. Should you aim to be big or fast? Should you create a blue ocean, be adaptive, play to win—or forget about a sustainable competitive advantage altogether? In a business environment that is changing faster and becoming more uncertain and complex almost by the day, it's never been more important—or more difficult—to choose the right approach to strategy. In this book, The Boston Consulting Group's Martin Reeves, Knut Haanæs, and Janmejaya Sinha offer a proven method to determine the strategy approach that is best for your company. They start by helping you assess your business environment—how unpredictable it is, how much power you have to change it, and how harsh it is—a critical component of getting strategy right. They show how existing strategy approaches sort into five categories—Be Big, Be Fast, Be First, Be the Orchestrator, or simply Be Viable—depending on the extent of predictability, malleability, and harshness. In-depth explanations of each of these approaches will provide critical insight to help you match your approach to strategy to your environment, determine when and how to execute each one, and avoid a potentially fatal mismatch. Addressing your most pressing strategic challenges, you'll be able to answer questions such as:

- What replaces planning when the annual cycle is obsolete?
- When can we—and when should we—shape the game to our advantage?
- How do we simultaneously implement different strategic approaches for different business units?
- How do we manage the inherent contradictions in formulating and executing different strategies across multiple businesses and geographies?

Until now, no book brings it all together and offers a practical tool for understanding which strategic approach to apply. Get started today.

Revised and Updated, Featuring a New Case Study How do successful companies create products people can't put down? Why do some products capture widespread attention while others flop? What makes us engage with certain products out of sheer habit? Is there a pattern underlying how technologies hook us? Nir Eyal answers these questions (and many more) by explaining the Hook Model—a four-step process embedded into the products of many successful companies to subtly encourage customer behavior. Through consecutive “hook cycles,” these products reach their ultimate goal of bringing users back again and again without depending on costly advertising or aggressive messaging. Hooked is based on Eyal's years of research, consulting, and practical experience. He wrote the book he wished had been available to him as a start-up founder—not abstract theory, but a how-to guide for building better products. Hooked is written for product managers, designers, marketers, start-up founders, and anyone who seeks to understand how products influence our behavior. Eyal provides readers with:

- Practical insights to create user habits that stick.
- Actionable steps for building products people love.
- Fascinating examples from the iPhone to Twitter, Pinterest to the Bible App, and many other habit-forming products.

Look out for Daniel Pink's new book, *When: The Scientific Secrets of Perfect Timing* #1 New York Times Business Bestseller #1 Wall Street Journal Business Bestseller #1 Washington Post bestseller From the bestselling author of *Drive* and *A Whole New Mind*, and teacher of the popular MasterClass on Sales and Persuasion, comes a surprising--and surprisingly useful--new book that explores the power of selling in our lives. According to the U.S. Bureau of Labor Statistics, one in nine Americans works in sales. Every day more than fifteen million people earn their keep by

persuading someone else to make a purchase. But dig deeper and a startling truth emerges: Yes, one in nine Americans works in sales. But so do the other eight. Whether we're employees pitching colleagues on a new idea, entrepreneurs enticing funders to invest, or parents and teachers cajoling children to study, we spend our days trying to move others. Like it or not, we're all in sales now. *To Sell Is Human* offers a fresh look at the art and science of selling. As he did in *Drive* and *A Whole New Mind*, Daniel H. Pink draws on a rich trove of social science for his counterintuitive insights. He reveals the new ABCs of moving others (it's no longer "Always Be Closing"), explains why extraverts don't make the best salespeople, and shows how giving people an "off-ramp" for their actions can matter more than actually changing their minds. Along the way, Pink describes the six successors to the elevator pitch, the three rules for understanding another's perspective, the five frames that can make your message clearer and more persuasive, and much more. The result is a perceptive and practical book--one that will change how you see the world and transform what you do at work, at school, and at home.

The Oxford Handbook of Strategic Sales and Sales Management is an unrivalled overview by leading academics in the field of sales and marketing management. Sales theory is experiencing a renaissance driven by a number of factors, including building profitable relationships, creating/delivering brand value, strategic customer management, sales and marketing relationships, global selling, and the change from transactional to customer relationship marketing. Escalating sales and selling costs require organisations to be more focused on results and highlight the shifting of resources from marketing to sales. Further the growth in customer power now requires a strategic sales response, and not just a tactical one. The positioning of sales within the organisation, the sales function and sales management are all discussed. The Handbook is not a general sales management text about managing a sales force, but will fill a gap in the existing literature through consolidating the current academic research in the sales area. The Handbook is structured around four key topics. The first section explores the strategic positioning of the sales function within the modern

organisation. The second considers sales management and recent developments. The third section examines the sales relationship with the customer and highlights how sales is responding to the modern environment. Finally, the fourth section reviews the internal composition of sales within the organisation. The Handbook will provide a comprehensive introduction to the latest research in sales management, and is suitable for academics, professionals, and those taking professional qualifications in sales and marketing.

"If we don't drop our price, we will lose the deal." That's the desperate cry from salespeople as they try to win deals in competitive marketplaces. While the easy answer is to lower the price, the company sacrifices margin--oftentimes unnecessarily. To win deals at the prices you want, the strategy needed is differentiation. Most executives think marketing is the sole source of differentiation. But what about the sales function of the company? This commonly neglected differentiation opportunity provides a multitude of ways to stand out from the competition. This groundbreaking book teaches you how to develop those strategies. In *Sales Differentiation*, sales management strategist, Lee B. Salz presents nineteen easy-to-implement concepts to help salespeople win deals while protecting margins. These concepts apply to any salesperson in any industry and are based on the foundation that "how you sell, not just what you sell, differentiates you." The strategies are presented in easy-to-understand stories and can quickly be put into practice. Divided into two sections, the "what you sell" chapters help salespeople: Recognize that the expression "we are the best" causes differentiation to backfire. Avoid the introspective question that frustrates salespeople and ask the right question to fire them up. Understand what their true differentiators are and how to effectively position them with buyers. Find differentiators in every nook and cranny of the company using the six components of the "Sales Differentiation Universe." Create strategies to position differentiators so buyers see value in them. The "how you sell" section teaches salespeople how to provide meaningful value to buyers and differentiate themselves in every stage of the sales process. This section helps salespeople: Develop

strategies to engage buyers and turn buyer objections into sales differentiation opportunities. Shape buyer decision criteria around differentiators. Turn a commoditized Request for Proposal (RFP) process into a differentiation opportunity. Use a buyer request for references as a way to stand out from the competition. Leverage the irrefutable, most powerful differentiator...themselves. Whether you've been selling for twenty years or are new to sales, the tools you learn in Sales Differentiation will help you knock-out the competition, build profitable new relationships, and win deals at the prices you want.

In the Senate, I've tried to do two things: tell the truth,

and do what I said I would do. We should expect that from every single elected official. Washington D.C. desperately needs leaders who aren't afraid to tell the truth. And Ted Cruz tells the truth—about political collusion, a corrupted legislative process, and the bureaucratic barriers to actually fixing the enormous challenges we face. Cruz's truth-telling habit hasn't made him popular in Washington. But it has earned him millions of supporters nationwide. Since his election to the Senate in 2012, Ted Cruz has refused to go along with the established way of doing business in Washington. In *A Time for Truth*, the outspoken Texas Senator tells his story for the first time—the story of a Cuban immigrant's son who made it to the Ivy League, to the Supreme Court bar, and eventually to the U.S. Senate. It's a deeply personal journey that begins with Cruz's father's experience of brutality in a Cuban prison and ends with Cruz's discovery that Washington has neither the courage nor the desire to do what is needed to preserve the freedom and opportunities that gave hope to his father and millions like him. Cruz discusses his role in the 2000 recount, helping to elect a president he respects—and whom he would have to stand up to a few short years later when he served as the solicitor general of Texas. He provides a behind-the-scenes look at his remarkable grassroots campaign for the U.S. Senate. And he reveals the true story behind his twenty-one-hour Senate filibuster, where he gave the most famous bedtime reading of *Green Eggs and Ham* in history. Pulling back the curtain on the backroom deals in Congress between Republicans, Democrats, and the

lobbyists who keep them in office—instead of keeping them accountable—Cruz offers an inside look at what has gone so very wrong in our nation's capital. But he also makes an optimistic case that by reestablishing the principles of our founders, the opportunities for our citizens, and our unique place in the world, we can reignite the promise of America for generations to come. *A Time for Truth* is sharp, funny, and honest. What Cruz reveals will win him few friends in Washington. Then again, that isn't why he went there in the first place.

The New Conceptual Selling has turned conventional sales thinking on its head by offering powerful, practical lessons that break down the boundaries of traditional product pitch selling. Based on the world-renowned Miller Heiman sales training programme, which has been adopted by some of the world's top companies, it is a thoroughly validated systematic process that has been shown to produce immediate, significant and reliable sales increases. Brian Tracy, one of the top professional speakers and sales trainers in the world today, found that his most important breakthrough in selling was the discovery that it is the "Psychology of Selling" that is more important than the techniques and methods of selling. Salespeople will learn: "the inner game of selling" how to eliminate the fear of rejection how to build unshakeable self-confidence Salespeople, says Tracy, must learn to control their thoughts, feelings, and actions to make themselves more effective.
