This work (the third edition) contains all the preparations that are used as veterinary drugs and medicines. It describes them according to their pharmacological and therapeutic classifications. Information is included in the text concerning the mechanisms of action of the drugs, side effects and dosages. All the drugs included here are suitable for use with both domestic and non-domestic species. The book aims to promote rational and effective treatment by grouping together the similar preparations of each drug.

A pharmaceutical handbook for the practicing veterinarian. The authors have divided the book into sections: small animal, large animal, exotic and avian. Each section provides both a summary of common dosages and a detailed description of drugs used. These descriptions, organized alphabetically, include indications, routes of administration, adverse and common side effects, drug interactions, source of supply and, in many cases, both the US and Canadian generic names.
